Sommario/riassunto	Contested Memories in Chinese and Japanese Foreign Policy explores the issue of memory and lack of reconciliation in East Asia. As main East Asian nations have never achieved a common memory of their pasts, in particular, the events of the Second World War and Sino-Japanese War, this book locates the issue of memory within International Relations theory, exploring the theoretical and practical link between the construction of a countrys identity and the formation and contestation of its historical memory and foreign policy. -- Amazon.com.
