Sommario/riassunto	Drogenmissbrauch in der Schwangerschaft hat negative Folgen für die werdende Mutter und ihr ungeborenes Kind. Eine möglichst frühe und umfassende Aufklärung ist deshalb eine der wichtigsten Aufgaben, die vor allem Ärztinnen und Ärzte leisten müssen, aber auch Angehörige aller Gesundheitsberufe, die Schwangere und junge Mütter betreuen. Ziel ist dabei, Mutter und Kind vor den Folgen des Drogenkonsums zu bewahren bzw. zumindest die Risiken so weit wie möglich zu minimieren. Grundlegende pharmakologische Kenntnisse der intrauterinen Exposition mit deren Langzeitfolgen und den sich daraus ergebenden therapeutischen Maßnahmen bilden die Basis zu diesen Aufgaben.
