

1. Record Nr.	UNINA9910583474303321
Titolo	Kaplan's essentials of cardiac anesthesia for noncardiac surgery // editor, Joel A. Kaplan, Brett Cronin, Timothy Maus
Pubbl/distr/stampa	Philadelphia, PA : , : Elsevier, Inc., , [2019]
Descrizione fisica	1 online resource (xii, 577 pages) : illustrations (some color)
Soggetti	Anesthesia in cardiology Anesthesia Anesthetics - pharmacology Heart Diseases
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	1. Perioperative cardiovascular evaluation and management for noncardiac surgery -- 2. Perioperative approach to the high-risk cardiac patient -- 3. Care of the patient with coronary stents undergoing noncardiac surgery -- 4. Cardiovascular implantable electronic device management in noncardiac surgery -- 5. Left ventricular assist device-supported patient presenting for noncardiac surgery -- 6. Anesthesia for noncardiac surgery after heart transplant -- 7. Pulmonary hypertension in noncardiac surgical patients -- 8. Adult congenital heart disease in noncardiac surgery -- 9. Cardiovascular monitoring in noncardiac surgery -- 10. Echocardiography in noncardiac surgery -- 11. Cardiovascular pharmacology in noncardiac surgery -- 12. General, regional, or monitored anesthesia care for the cardiac patient undergoing noncardiac surgery -- 13. Vascular surgery: endovascular and open surgery -- 14. The cardiac patient for thoracic noncardiac surgery -- 15. Anesthesia for cardioversion and electrophysiologic procedures -- 16. Cardiac patients requiring emergent noncardiac surgery -- 17. Cardiac considerations during orthotopic liver transplantation -- 18. The pregnant patient with cardiac disease -- 19. Goal-directed fluid therapy, perioperative pain management, and enhanced recovery -- 20. Management in the postanesthesia care unit of complications in cardiac

patients -- 21. Postoperative care of the critically ill -- 22. Reducing major adverse cardiac events and all-cause mortality in noncardiac surgery: perioperative strategies.

Sommario/riassunto

The chapters in *Essentials of Cardiac Anesthesia for Noncardiac Surgery* have been written by acknowledged experts in each specific area, and the material has been coordinated to maximize its clinical value. Recent information has been integrated from anesthesiology, surgery, cardiology, critical care medicine, and clinical pharmacology to present a complete clinical picture. This "essential" information will assist the clinician in understanding the basic principles of each subject and facilitate their application in practice. Because of the large volume of information presented, several teaching aids have been included to help highlight the most important clinical information. Teaching boxes include many of the key take-home messages. In addition, the Key Points at the start of each chapter highlight the major areas covered. Finally, each chapter includes a list of Suggested Reading for additional information, rather than an extensive list of references.
