Sommario/riassunto	Innovations in Road, Railway and Airfield Bearing Capacity Volume 3 comprises the third part of contributions to the 11th International Conference on Bearing Capacity of Roads, Railways and Airfields (2022). In anticipation of the event, it unveils state-of-the-art information and research on the latest policies, traffic loading measurements, in-situ measurements and condition surveys, functional testing, deflection measurement evaluation, structural performance prediction for pavements and tracks, new construction and rehabilitation design systems, frost affected areas, drainage and environmental effects, reinforcement, traditional and recycled materials, full scale testing and on case histories of road, railways and airfields. This edited work is intended for a global audience of road, railway and airfield engineers, researchers and consultants, as well as building and maintenance companies looking to further upgrade their practices in the field.

Sommario/riassunto	No-one can hope to understand the workings of the welfare state without first appreciating women's part in it. In the past decade the significance of the gendering of welfare states has become widely accepted, extensively charted in research, and more systematically theorized. Building on her earlier work, in Social Policy: A New Feminist Analysis Gillian Pascall confronts the challenges and outlines the developments that have taken place during the eleven years since its first publication. This new edition also reflects extensive social changes in women's participation at work, educational ac
