

1. Record Nr.	UNINA9910585940403321
Autore	Mauro Rosario Paolo
Titolo	Neglected and Underutilized Plant Species in Horticultural and Ornamental Systems : Perspectives for Biodiversity, Nutraceuticals and Agricultural Sustainability
Pubbl/distr/stampa	Basel, : MDPI - Multidisciplinary Digital Publishing Institute, 2022
Descrizione fisica	1 online resource (236 p.)
Soggetti	Biology, life sciences Research & information: general Technology, engineering, agriculture
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This Special Issue contributes to filling knowledge gaps regarding NUS in horticultural and ornamental systems, as well as in landscapes, by collecting original research papers dealing with the relevance of NUS to the following topics: biodiversity and conservation; genetics and breeding; characterization, propagation, and ecophysiology; cultivation techniques and systems; landscape protection and restoration; product and process innovations; biochemistry and composition; and postharvest factors affecting their end-use quality.
