1.	Record Nr.	UNINA9910585957303321
	Autore	Grant Tim (Professor of forensic linguistics)
	Titolo	The idea of progress in forensic authorship analysis / / Tim Grant [[electronic resource]]
	Pubbl/distr/stampa	Cambridge University Press, 2022
		Cambridge : , : Cambridge University Press, , 2022
	ISBN	1-108-98130-5
		1-108-98288-3
		1-108-97471-6
	Descrizione fisica	1 online resource (74 pages) : digital, PDF file(s)
	Collana	Cambridge elements. Elements in forensic linguistics , 2634-7334
	Disciplina	363.25
	Soggetti	Forensic linguistics
		Authorship - Technique
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Open Access.
		Title from publisher's bibliographic system (viewed on 07 Apr 2022).
	Sommario/riassunto	This Element examines progress in research and practice in forensic authorship analysis. It describes the existing research base and examines what makes an authorship analysis more or less reliable. Further to this, the author describes the recent history of forensic science and the scientific revolution brought about by the invention of DNA evidence. They chart the rise of three major changes in forensic science - the recognition of contextual bias in analysts, the need for validation studies and shift in logic of providing identification evidence. This Element addresses the idea of progress in forensic authorship analysis in terms of these three issues with regard to new knowledge about the nature of authorship and methods in stylistics and stylometry. The author proposes that the focus needs to shift to validation of protocols for approaching case questions, rather than on validation of systems or general approaches. This title is also available as Open Access on Cambridge Core.
