Livello bibliografico	Monografia
Note generali	Title from publisher's bibliographic system (viewed on 27 Sep 2021).
Sommario/riassunto	Processes of post-war reconstruction, peacebuilding and reconciliation are partly about fostering stability and adaptive capacity across different social systems. Nevertheless, these processes have seldom been expressly discussed within a resilience framework. Similarly, although the goals of transitional justice - among them (re)establishing the rule of law, delivering justice and aiding reconciliation - implicitly encompass a resilience element, transitional justice has not been explicitly theorised as a process for building resilience in communities and societies that have suffered large-scale violence and human rights violations. The chapters in this unique volume theoretically and empirically explore the concept of resilience in diverse societies that

have experienced mass violence and human rights abuses. They analyse the extent to which transitional justice processes have - and can - contribute to resilience and how, in so doing, they can foster adaptive peacebuilding. This book is available as Open Access.
