Titolo	Governing the climate-energy nexus : institutional complexity and its challenges to effectiveness and legitimacy // edited by Fariborz Zelli, Karin Backstrand, Naghmeh Nasiritousi, Jakob Skovgaard, Oscar Widerberg [[electronic resource]]
Pubbl/distr/stampa	Cambridge University Press, 2020 Cambridge : , : Cambridge University Press, , 2020
ISBN	1-108-75622-0 1-108-61879-0 1-108-67639-1
Descrizione fisica	1 online resource (xxii, 269 pages) : digital, PDF file(s)
Collana	Physical Sciences
Disciplina	393.738/74561
Soggetti	Global environmental change - Government policy Fossil fuels - Government policy Renewable energy sources - Government policy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from publisher's bibliographic system (viewed on 29 Jun 2020).
Sommario/riassunto	Combating climate change and transitioning to fossil-free energy are two central and interdependent challenges facing humanity today. Governing the nexus of these challenges is complex, and includes multiple intergovernmental and transnational institutions. This book analyses the governance interactions between such institutions, and explores their consequences for legitimacy and effectiveness. Using a novel analytical framework, the contributors examine three policy fields: renewable energy, fossil fuel subsidy reform, and carbon pricing. These fields are compared in terms of their institutional memberships, governance functions and overarching norms. Bringing together prominent researchers from political science and international relations, the book offers an essential resource for future research and provides policy recommendations for effective and legitimate governance of the climate-energy nexus. Rooted in the most recent research, it is an invaluable reference for researchers, policymakers and

other stakeholders in climate change and energy politics.
