Sommario/riassunto

This collection opens the geospatiality of "Asia" into an environmental framework called "Oceania" and pushes this complex regional multiplicity towards modes of trans-local solidarity, planetary consciousness, multi-sited decentering, and world belonging. At the transdisciplinary core of this "worlding" process lies the multiple spatial and temporal dynamics of an environmental eco-poetics, articulated via thinking and creating both with and beyond the Pacific and Asia imaginary.
