Harmony of Eastern and Western Diet.
Sommario/riassunto	This book offers an excellent introduction to Korean functional foods and shares latest important information for food scientists and nutritionists, including accurate, up-to-date information on Korean food science together with background information, archeological findings, as well as food methods and research on Korean fermented foods (e.g., grain wine, kimchi, jeotgal, and soybean sauces). It also

discusses historical backgrounds and manufacturing method details of traditional food categories, such as rice cakes, sweets, fermented sauces, and alcoholic and non-alcoholic beverages, and helps us understand the full science behind Korean traditional food. This book elaborates on the various changes in food culture brought about by recent updates, and inspires future contributions of Korean food concepts, particularly regarding the latest research on the intersection of food and Traditional Eastern Medicine. While the book will be particularly valuable for researchers and scholars interested in specifics in food science, it will also appeal to traditional medicine researchers seeking new knowledge for current functional foods.

#### Sommario/riassunto

Arnold Geulincx (1624-1669) is a key figure in the history of ideas, whose concepts have been seen as precursors to those developed by Spinoza, Malebranche, Leibniz and Kant. His Ethics presents a treatment of virtue from the standpoint of occasionalist metaphysics. The great Irish writer Samuel Beckett stated that Geulincx, with his emphasis on the powerlessness and ignorance of the human condition, was a key influence on his works. This is the first complete version of the text to appear in a modern language. It includes the full text of the Ethics and Beckett's notes to his reading of Geulincx. Shedding new light on important moments of intellectual history, it is a major event for students of philosophy and literature. Brill's Texts and Sources in Intellectual History , volume 1
