Sommario/riassunto	This book aims to provide a complete overview of the current status of lifestyle and transport changes in China, focusing on the ongoing trends in lifestyle and transport technologies, which are shaping a new lifestyle and transport system. An additional focus is to discuss the mechanism behind the influence of transport on lifestyles, and analyze the influence of transport facilities on lifestyles, which will help to give efficient and effective transport solutions. Using macro statistics and survey data from Beijing and Chinese villages and towns, this book explores the interactive development of lifestyle and transportation in China over the past 40 years. The analyses and findings in this book would enhance our existing knowledge of the relationship lifestyle and transport. The policies discussed in the book would provide fresh evidences for policy-making on updating transport services in order to cope with the changes of people's lifestyle. This book will be of great

interest to scholars and governmental agencies interested in transport development, transport policy, social transition, sustainable transport, urban planning, urban governance, and is relevant to China and other developing countries. .
