Nota di contenuto	1. Introduction -- 2. History of Concepts and Principles -- 3. Contemporary Institutional and Evolutionary Concepts and Principles -- 4. Global Coronavirus Pandemic Crisis -- 5. Climate Change -- 6. Corruption -- 7. Artificial General Intelligence and Autonomous Humanoid Robotics -- 8. Policy and Governance -- 9. Money and Credit Circuits, Cycles and Crises -- 10. Terrorism and the War on Terrorism -- 11. HIV and AIDS -- 12. Love and the Nurturance Gap -- 13. Conclusion -- Glossary -- Index.
Sommario/riassunto	This is the very first book to explicitly both detail the core general principles of institutional and evolutionary political economy and also

apply the principles to current world problems such as the coronavirus crisis, climate change, corruption, AI-Robotics, policy-governance, money and financial instability, terrorism, AIDS-HIV and the nurturance gap. No other book has ever detailed explicitly such core principles and concepts nor ever applied them explicitly to numerous current major problems. The core general principles and concepts in this book, which are outlined and detailed include historical specificity & evolution; hegemony & uneven development; circular & cumulative causation; heterogeneous groups & agents; contradiction & creative destruction; uncertainty; innovation; and policy & governance. This book details the nature of how these principles and concepts can be used to explain current critical issues and problems throughout the world. This book includes updated chapters that have won two journal research Article of the Year Awards on climate change (one from the European Association for Evolutionary Political Economy, EAEPE); as well as a Presidential address to the Association for Evolutionary Economics (AFEE) on corruption. The structure of the book starts with two chapters on the principles of institutional and evolutionary political economy: firstly their history, and secondly a chapter on the contemporary nature of the principles and concepts. This is followed by nine chapters applying some of the core principles to current world problems such as the coronacrisis, climate change, corruption, AI-robotics, policy, money & financial instability, terrorism, HIV-AIDS and the nurturance gap. The book finishes with a conclusion, a glossary of major terms and an index. The author's principles are well established in the literature and this book provides a detailed exposition of them and their application.
