

1. Record Nr.	UNINA9910590056203321
Autore	Greene Roberta
Titolo	A Resilience-Enhancing Stress Model : A Social Work Multisystemic Practice Approach // by Roberta Greene, Nicole Dubus, Nancy Greene
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2022
ISBN	3-031-08112-9
Edizione	[1st ed. 2022.]
Descrizione fisica	1 online resource (176 pages)
Disciplina	616.805 361.3
Soggetti	Psychology Social work education Social psychiatry Social service - Research Social service Behavioral Sciences and Psychology Social Work Education Clinical Social Work Social Work Research Social Work Estrès (Psicologia) Serveis socials Aspectes psicològics Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Part I: RESM Research and Theoretical Background -- 1.Research-Informed Social Work Practice -- 2.An Evolving Resilience-Enhancing Stress Model -- Part II: The RESM Method: Narrative Interviewing -- 3. Interviewing: The Four Phases of the Resilience-Enhancing Stress Model -- 4.Interviewing to Promote Resilience Among Marginalized Populations -- 5.Using the RESM Narrative Method to Map Assessment Content -- Part III: RESM Multisystemic Applications -- 6.Co-creating a

Grand Narrative: The Intersection of Individual, Family, and Community Practice -- 7.Enhancing Resilience and Functioning Among Older Adults and Their Caregivers -- 8.Fostering Resilience Among Returning Military Personnel and Their Families -- 9.Resilience Practice Strategies for Urbanized Societies -- 10.Connecting Communal Living, Ecology, and Resilience -- 11.Using the RESM in Work With Forced Migrants.

---

Sommario/riassunto

Social work practice has evolved to meet the needs of the time, the problems that are present, and the knowledge and skills available. Given the more recent rapidly changing stressful environments, political, economic, demographic, sociocultural, and ideological change has affected how practice is defined. Now it is even more essential for there to be innovative theoretical concepts and intervention strategies to support current practice. This textbook addresses today's context of social work practice that needs to deal with the complexity of personal and social relationships, the continuing historical flux of the times, and the constant anxiety or "threats and pulls" of daily life. The text is based on the idea that social work practice requires a research and theoretical base that allows practitioners to build on a client's ability to persist in the face of life's challenges and to proceed positively with life events. The Resilience-Enhancing Stress Model (RESM) is an outgrowth of the profession's interest in strength-based person-environment approaches — grounded in generalist social work practice that offers a range of intervention practice methods with diverse individuals, families, groups, organizations, and communities. RESM was developed to provide the skill set for working with clients and constituencies across the individual-family-community configuration during times of distress. It also can be a welcomed addition to social work practice with people undertaking life transitions and overcoming disruption to individual, family, and community function. Topics explored include: An Evolving Resilience-Enhancing Stress Model Interviewing to Promote Resilience Among Marginalized Populations Co-creating a Grand Narrative: The Intersection of Individual, Family, and Community Practice Connecting Communal Living, Ecology, and Resilience A Resilience-Enhancing Stress Model: A Social Work Multisystemic Practice Approach is a timely text for human behavior and practice methods at the generalist or advanced generalist levels in social work. It can also be used at the doctoral level of social work education depending on the professor's attention to the depth of theoretical concepts. Practitioners in the field may find the contents useful to their professional enrichment.
