Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Patterns of Architectural Variability in the Native Southeast -- Environmental Factors in Architectural Variation -- Household Composition and Economics -- Houses and Architectural Symbolism -- Houses, Status, and Settlement -- Conclusion: A Macroregional Perspective on Architectural Variation in the Native Southeast -- Appendix: Description of the Architectural Variables.
Sommario/riassunto	"This book explores changes in houses and households in the southeastern United States from the Woodland to the Historic Indian Period (ca. 200 B.C. to A.D. 1800). Most studies of domestic architecture in the Southeast have been conducted at the single-site scale. As a result, broader spatial and temporal patterns of variation in houses and households are not well understood. To address this problem, Steere constructed a database that catalogues the

architectural features of 1,258 structures from 65 sites in the Southern Appalachian region and surrounding areas. Significant trends identified by this comparative study include changes in the size and spacing of houses, changes in architectural investment, and a secular trend toward the increasing segmentation of houses. Using a theoretical framework developed from household archaeology and anthropology, Steere argues that certain aspects of this architectural variation can be explained by changes in household economics and household composition, symbolic behavior, status differentiation, and settlement patterning. More generally, he proposes that large-scale patterns of diachronic and synchronic variation in domestic architecture are best explained by changes in social organization"--Provided by publisher.

Nota di contenuto	Taking On the Ghazlian Challenge of Integrating Science and Theology with Islam and Biomedicine -- Medical Epistemology in Arabic Discourse from Greek Sources to the Arabic Commentary Tradition -- The Piety of Health: The Making of Health in Islamic Religious

Narratives -- The Concept of a Human Microcosm: Exploring Possibilities for a Synthesis between Traditional and Modern Biomedicine -- Islam in Engagement with Life, Health and Medicine -- When Does a Human Fetus Become Human? -- At the Meeting of the Two Seas: The Value of Integrating Philosophy of Science and Religion in Determining the Nature and Purpose of the Human Self -- Muslim Values and End-of-Life Healthcare Decision-making: Values, Norms and Ontologies in Conflict? -- Intersection between Science, Philosophy and the Sunn Theological and Legal discourse in Defining Medical Death -- Islam and Science: Deepening the Discourse -- Science through an Islamic Epistemological Framework -- Interface between Islamic Law and Science: Legal Construction of Science in Light of Islamic Bioethical Discourses on Genetic and Reproductive Technologies -- Integrating Science and Scripture to Produce Moral Knowledge: Assessing Human Interests and Necessities in Islamic Bioethics. .

Sommario/riassunto

This book showcases multidisciplinary research at the intersection of the Islamic tradition and biomedicine. Within this broad area of scholarship, this book considers how Islamic theological constructs align with the science and practice of medicine, and in so doing offer resources for bridging the challenges of competing ontological visions, varied epistemic frameworks, and different theologies of life and living among the bodies of knowledge. By bringing together theologians, medical practitioners and intellectual historians, the book spurs deeper conversations at the intersection of these fields and provides fundamental resources for further dedicated research.
