

1. Record Nr.	UNINA9910595067003321
Autore	Al-Samman Talal
Titolo	Microstructure-Mechanical Properties and Application of Magnesium Alloys
Pubbl/distr/stampa	Basel, : MDPI Books, 2022
Descrizione fisica	1 electronic resource (198 p.)
Soggetti	Technology: general issues History of engineering & technology Materials science
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This Special Issue reprint book features a broad scope of contributions that highlight current accomplishments and provide readers with some perspective on the direction of research on magnesium alloys in the near future with respect to global challenges. The papers included in the book report on state-of-the-art methods and research trends regarding the microstructure, properties and industrial application of magnesium alloys for use in lightweight structures across several industries.
