

1. Record Nr.	UNINA9910595076703321
Autore	Donyai Parastou
Titolo	Medicines Reuse
Pubbl/distr/stampa	Basel, : MDPI - Multidisciplinary Digital Publishing Institute, 2022
Descrizione fisica	1 online resource (192 p.)
Soggetti	Manufacturing industries Medicine and Nursing
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>This reprint examines the concept of medicines reuse, the idea that unused medication returned by one patient can be re-dispensed for use by another. Ten papers written by over 20 authors examine a range of issues related to medicines reuse including the circular economy of the pharmaceutical supply chain; the prevalence of unused medicines or medication waste within patients' homes; people's views about the causes of medication waste and the potential for medicines reuse; what might influence people to reuse medicines in the future; how sensing technologies might facilitate medicines reuse; and the effect of including sensing technologies on people's willingness to consider medicines reuse.</p>
