   Titolo   Cyber Security and Critical Infrastructures

   Pubbl/distr/stampa Basel, : MDPI Books, 2022

   Descrizione fisica 1 electronic resource (326 p.)

   Soggetti   Technology: general issues
                     History of engineering & technology

   Lingua di pubblicazione Inglese

   Formato   Materiale a stampa

   Livello bibliografico Monografia

   Sommario/riassunto This book contains the manuscripts that were accepted for publication
                     in the MDPI Special Topic "Cyber Security and Critical Infrastructure"
                     after a rigorous peer-review process. Authors from academia,
                     government and industry contributed their innovative solutions,
                     consistent with the interdisciplinary nature of cybersecurity. The book
                     contains 16 articles: an editorial explaining current challenges,
                     innovative solutions, real-world experiences including critical
                     infrastructure, 15 original papers that present state-of-the-art
                     innovative solutions to attacks on critical systems, and a review of
                     cloud, edge computing, and fog's security and privacy issues.
