On the Nature of Industrialization in the Caribbean Basin; 15. Can the Dominican Republic's Export-Processing Zones Survive NAFTA?; Part VI: Conclusion; 16. NAFTA and Uneven Development in the North American Apparel Industry; About the Contributors; Index

Sommario/riassunto

This volume addresses many of the complex issues raised by North American integration through the lens of one of the largest and most global industries in the region: textiles and apparel. In part, this is a story of winners and losers in the globalization process, especially if one focuses on jobs lost and jobs gained in different countries and communities within North America, defined here as: Canada, the United States, Mexico, Central America, and the Caribbean. However, it would be a mistake to view the industry solely in these zerosum terms. The North American apparel industry is an excel

Sommario/riassunto	Digitalisation, digital networks, and artificial intelligence are fundamentally changing our lives! We must understand the various developments and assess how they interact and how they affect our regular, analogue lives. What are the consequences of such changes for me personally and for our society? Digital networks and artificial intelligence are seminal innovations that are going to permeate all areas of society and trigger a comprehensive, disruptive structural change that will evoke numerous new advances in research and development in the coming years. Even though there are numerous books on this subject matter, most of them cover only specific aspects of the profound and multifaceted effects of the digital transformation. An overarching assessment is missing. In 2016, the Federation of German Scientists (VDW) has founded a study group to assess the technological impacts of digitalisation holistically. Now we present this compendium to you. We address the interrelations and feedbacks of

digital innovation on policy, law, economics, science, and society from various scientific perspectives. Please consider this book as an invitation to contemplate with other people and with us, what kind of world we want to live in!
