

1. Record Nr.	UNINA9910595598803321
Autore	Pluth Michael D
Titolo	Hydrogen Sulfide : Chemical Biology Basics, Detection Methods, Therapeutic Applications, and Case Studies
Pubbl/distr/stampa	Newark : , : John Wiley & Sons, Incorporated, , 2022 ©2023
ISBN	1-119-79990-2 1-119-79988-0
Descrizione fisica	1 online resource (645 pages)
Collana	Wiley Series in Drug Discovery and Development Ser.
Altri autori (Persone)	WangBinghe
Soggetti	Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Table of Contents -- Title Page -- Copyright -- Preface -- List of Contributors -- 1 Fundamental and Biologically Relevant Chemistry of H ₂ S and Related Species -- List of Abbreviations -- 1.1 Introduction -- 1.2 The Chemical Biology of H ₂ S -- 1.3 H ₂ S Reactions with Other Sulfur Species -- 1.4 The Biochemical Utility of RSSH -- 1.5 Summary/Conclusion -- References -- 2 Signaling by Hydrogen Sulfide (H ₂ S) and Polysulfides (H ₂ Sn) and the Interaction with Other Signaling Pathways -- List of Abbreviations -- 2.1 Introduction -- 2.2 Determination of the Endogenous Concentrations of H ₂ S -- 2.3 H ₂ S and H ₂ Sn as Signaling Molecules -- 2.4 Crosstalk Between H ₂ S and NO -- 2.5 Cytoprotective Effect of H ₂ S, H ₂ Sn, and H ₂ SO ₃ -- 2.6 Energy Formation in Mitochondria with H ₂ S -- 2.7 SSulfurated Proteins and Bound Sulfane Sulfur in Cells -- 2.8 Regulating the Activity of Target Proteins by H ₂ S and H ₂ Sn -- 2.9 Perspectives -- Acknowledgments -- Author Disclosure Statement -- References -- 3 Persulfides and Their Reactions in Biological Contexts -- List of Abbreviations -- 3.1 Persulfides Are Key Intermediates in Sulfur Metabolism and Signaling -- 3.2 Persulfides Are Formed in Biological Systems through Different Pathways -- 3.3 Persulfides Are More Acidic Than Thiols -- 3.4 Persulfides Are Stronger Nucleophiles Than Thiols -- 3.5 Persulfidation Protects Against Irreversible Oxidation -- 3.6 Persulfides Interact with Metals and Metalloproteins -- 3.7 Persulfides Have Electrophilic

Character in Both Sulfur Atoms -- 3.8 Persulfides Are Efficient One Electron Reductants -- 3.9 Concluding Remarks -- References -- Notes -- 4 Hydrogen Sulfide, Reactive Nitrogen Species, and "The Joy of the Experimental Play*" -- 4.1 Introduction -- 4.2 Basic Physicochemical Properties of Nitric Oxide and Its Biological Relevant Metabolites. 4.3 Basic Physicochemical Properties of H₂S and Its Biological Relevant Metabolites -- 4.4 Inorganic Sulfur-Nitrogen Compounds -- 4.5 Putative Biological Relevance of the NO/H₂S Chemical Interaction -- 4.6 Summary and Conclusions -- Acknowledgment -- References -- Note -- 5 H₂S and Bioinorganic Metal Complexes -- List of Abbreviations -- 5.1 Introduction -- 5.2 Basic Ligative Properties of H₂S/HS -- 5.3 H₂S and Heme Iron -- 5.4 H₂S and Nonheme Iron -- 5.5 H₂S Chemistry with Other Metals -- 5.6 H₂S Sensing with Transition Metal Complexes -- 5.7 Summary -- Acknowledgments -- References -- 6 Measurement of Hydrogen Sulfide Metabolites Using the Monobromobimane Method -- List of Abbreviations -- 6.1 Introduction -- 6.2 Monobromobimane: An Optimal Method of Bioavailable Sulfur Detection -- 6.3 Procedures -- 6.4 Caveats and Considerations -- Acknowledgment -- Disclosures -- References -- 7 Fluorescent Probes for H₂S Detection: CyclizationBased Approaches -- List of Abbreviations -- 7.1 Introduction -- 7.2 General Design of Nucleophilic ReactionCyclization Based Fluorescent Probes -- 7.3 Conclusions and Perspectives -- Acknowledgments -- References -- 8 Fluorescent Probes for H₂S Detection: ElectrophileBased Approaches -- 8.1 Introduction -- 8.2 Selected Probes Based on Different Reaction Types -- 8.3 Conclusion and Future Prospects -- References -- 9 Fluorescent Probes for H₂S Detection: MetalBased Approaches -- 9.1 Introduction -- 9.2 Metal Displacement Approach -- 9.3 Coordinative Based Approach -- 9.4 H₂S Mediated Reduction of the Metal Center -- 9.5 Conclusions and Future Outlooks -- References -- 10 H₂S Release from P S and Se-S Motifs -- List of Abbreviations -- 10.1 Introduction -- 10.2 H₂S Release from P S Motifs -- 10.3 H₂S Release from Se-S Motifs -- 10.4 Acyl Selenylsulfides: Structural Modifications and Activity of Analogs. 10.5 Conclusions -- References -- 11 Hydrogen Sulfide: The Hidden Player of Isothiocyanates Pharmacology -- 11.1 Organic Isothiocyanates as H₂S Donors -- 11.2 Organic ITCs and Cardiovascular System -- 11.3 Chemopreventive Properties of ITCs -- 11.4 Antinociceptive Effects of ITCs -- 11.5 Antiinflammatory and Antiviral Effects of ITCs -- 11.6 Conclusion -- Acknowledgment -- References -- 12 Persulfide Prodrugs -- List of Abbreviations -- 12.1 Introduction -- 12.2 Persulfide Prodrugs -- 12.3 Challenges in Persulfide Prodrug Design and Potential Therapeutic Applications -- References -- 13 COSBased H₂S Donors -- 13.1 Introduction -- 13.2 Properties of COS -- 13.3 COSBased H₂S Delivery -- 13.4 Conclusions and Outlook -- Acknowledgments -- References -- 14 Light Activatable H₂S Donors -- 14.1 Introduction -- 14.2 Photophysical and Photochemical Concepts -- 14.3 Phototherapeutic Window -- 14.4 Light Sources -- 14.5 (Photo)Physical Properties of H₂S -- 14.6 Mechanisms and Examples of H₂S Photorelease -- 14.7 Outlook -- Acknowledgment -- References -- 15 Macromolecular and Supramolecular Approaches for H₂S Delivery -- List of Abbreviations -- 15.1 Introduction -- 15.2 H₂S Donating Linear Polymers -- 15.3 H₂S Delivery from Branched and Graft Polymer Topologies -- 15.4 Polymer Micelles for H₂S Delivery -- 15.5 Polymer Networks for Localized H₂S Delivery -- 15.6 Other Polymeric Systems for the Encapsulation of H₂S Donors -- 15.7 H₂S Release via Supramolecular Systems -- 15.8 Conclusions and Future Perspectives -- References -- 16 H₂S and

Hypertension -- List of Abbreviations -- 16.1 Hypertension, Vascular Homeostasis and Mediators Controlling Blood Pressure -- 16.2 Generation of H₂S in the Cardiovascular System -- 16.3 Relevance of H₂S in Hypertension -- 16.4 Conclusions -- References -- 17 H₂S Supplementation and Augmentation: Approaches for Healthy Aging. List of Abbreviations -- 17.1 Introduction and Background -- 17.2 Hydrogen Sulfide Metabolism and Applications in Nonmammalian Aging -- 17.3 Hydrogen Sulfide Metabolism and Applications in Nonhuman Mammalian Aging -- 17.4 Hydrogen Sulfide Metabolism and Applications in Human Aging and AgingRelated Disorders -- 17.5 Conclusions and Summary -- Acknowledgments -- References -- 18 Aberrant Hydrogen Sulfide Signaling in Alzheimer's Disease -- List of Abbreviations -- 18.1 Introduction -- 18.2 Alzheimer's Disease -- 18.3 Therapeutic Avenues -- Acknowledgments -- References -- 19 Multifaceted Actions of Hydrogen Sulfide in the Kidney -- List of Abbreviations -- 19.1 Introduction -- 19.2 H₂S Synthesis in the Kidney -- 19.3 H₂S and Kidney Physiology -- 19.4 H₂S and the Aging Kidney -- 19.5 H₂S and Acute Kidney Injury (AKI) -- 19.6 H₂S in Chronic Kidney Disease (CKD) -- 19.7 H₂S and Preeclampsia -- 19.8 H₂S and Genitourinary Cancers -- 19.9 Conclusion and Future Directions -- Acknowledgments -- References -- Index -- End User License Agreement.
