Formato	Materiale a stampa
Livello bibliografico	Periodico
Note generali	Title from caption (viewed Dec. 18, 2007). "The International Journal of Infection Control (IJIC) is the official journal of the International Federation of Infection Control (IFIC). IJIC covers key topics and issues in infection control and epidemiology. Infection control professionals, including physicians, nurses, and epidemiologists, rely on IJIC for articles covering clinical topics. The aim of the journal is to inform members about IFIC activities and to provide members and individuals in countries without infection control societies with state of the art articles and articles on infection control practice. Persons in member societies are also encouraged to submit useful articles to be considered for publication. As the official publication of the IFIC, IJIC is the foremost international resource on infection control, epidemiology, infectious diseases, occupational health, and disease prevention. The IJIC has evolved from the IFIC Bulletin (formerly IFIC Newsletter) and some of the past issues of the Bulletin/Newsletter are available for download at the Publications page "
