Autore	Beretta Marco
Titolo	A Cultural History of Chemistry in Antiquity // Marco Beretta
Pubbl/distr/stampa	London, United Kingdom : , : Bloomsbury Academic, , 2021
Descrizione fisica	1 online resource (312 pages) : illustrations
Collana	The Cultural Histories Series
Disciplina	540.9
Soggetti	Chemistry - Social aspects Chemistry - History
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	A Cultural History of Chemistry in Antiquity covers the period from 3000 BCE to 600 CE, ranging across the civilizations of the Mediterranean and Near East. Over this long period, chemical artisans, recipes, and ideas were exchanged between Mesopotamia, Egypt, Phoenicia, Greece, Rome, and Byzantium. The flowering of alchemy in the Middle and Early Modern Ages had its roots in the chemical arts of antiquity. This study presents the first synthesis of this epoch, examining the centrality of intense exchange and interconnectivity to the discovery and development of sources, techniques, materials, and instruments.
