

1. Record Nr.	UNINA9910597909403321
Autore	Dullaart Robin P. F.
Titolo	Novel Aspects of Lipoprotein Metabolism with Focus on Systemic Inflammation // Robin P.F. Dullaart
Pubbl/distr/stampa	Basel : , : MDPI - Multidisciplinary Digital Publishing Institute, , 2020
Descrizione fisica	1 online resource (248 pages) : illustrations
Disciplina	616.0473
Soggetti	Inflammation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	<p>About the Special Issue Editor vii -- Preface to "Novel Aspects of Lipoprotein Metabolism with Focus on Systemic Inflammation" ix -- Nicolas Vuilleumier, Sabrina Pagano, Christophe Combescure, Baris Gencer, Julien Virzi, Lorenz R ¨aber, David Carballo, Sebastian Carballo, David Nanchen, Nicolas Rodondi, Stephan Windecker, Stanley L. Hazen, Zeneng Wang, Xinmin S. Li, Arnold von Eckardstein, Christian M. Matter, Thomas F. L ¨uscher, Roland Klingenberg and Francois Mach Non-Linear Relationship between Anti-Apolipoprotein A-1 IgGs and Cardiovascular Outcomes in Patients with Acute Coronary Syndromes Reprinted from: J. Clin. Med. 2019, 8, 1002, doi:10.3390/jcm8071002</p> <p>1 -- Nicolas Vuilleumier, Sabrina Pagano, Fabrizio Montecucco, Alessandra Quercioli, Thomas H. Schindler, Fran,cois Mach, Eleonora Cipollari, Nicoletta Ronda and Elda Favari Relationship between HDL Cholesterol Efflux Capacity, Calcium Coronary Artery Content, and Antibodies against ApolipoproteinA-1 in Obese and Healthy Subjects Reprinted from: J. Clin. Med. 2019, 8, 1225, doi:10.3390/jcm8081225</p> <p>15 -- Sabrina Pagano, Alessandra Magenta, Marco D'Agostino, Francesco Martino, Francesco Barill `a, Nathalie Satta, Miguel A. Frias, Annalisa Ronca, Fran,cois Mach, Baris Gencer, Elda Favari and Nicolas Vuilleumier Anti-ApoA-1 IgGs in Familial Hypercholesterolemia Display Paradoxical Associations with Lipid Profile and Promote Foam Cell Formation Reprinted from: J. Clin. Med. 2019, 8, 2035, doi:10.3390/jcm8122035</p> <p>31 -- Josephine L.C. Anderson, Sabrina Pagano, Julien Virzi, Robin P.F. Dullaart, Wijtske Annema, Folkert Kuipers, Stephan J.L.</p>

Bakker, Nicolas Vuilleumier and Uwe J.F. Tietge Autoantibodies to Apolipoprotein A-1 as Independent Predictors of Cardiovascular Mortality in Renal Transplant Recipients Reprinted from: *J. Clin. Sommario/riassunto

With cardiometabolic diseases still topping the list of mortality causes and in facing the obesity and diabetes epidemic, there remains a great need to better understand the pathophysiological derangements underlying these conditions. During the past years, it has become increasingly appreciated that low grade systemic inflammation is a common hallmark of cardiometabolic disorders--not only concerning diabetes and atherosclerotic cardiovascular disease but also involving non-alcoholic fatty liver disease. Recently developed high-throughput laboratory techniques for lipidomics and metabolomics have enabled researchers to discern novel crosstalk pathways between lipid phenotypes and enhanced chronic inflammation. With this Special Issue of the Journal of Clinical Medicine, entitled "Novel Aspects of Lipoprotein Metabolism with a Focus on Systemic Inflammation", researchers were invited to submit original papers and reviews on various topics, in particular, at the interface of lipid metabolism and inflammation.
