

1. Record Nr.	UNINA9910597915403321
Titolo	Marine Compounds and Cancer // edited by Friedemann Honecker, Sergey A. Dyshlovoy
Pubbl/distr/stampa	Basel : , : MDPI - Multidisciplinary Digital Publishing Institute, , 2018
Descrizione fisica	1 online resource (v, 110 pages)
Disciplina	615.945
Soggetti	Cancer - Radiotherapy Marine toxins
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>The very first marine-derived anticancer drug, Cytarabine (aka Ara-C, Cytosar-U(R)), was approved by the FDA in 1969 for the treatment of leukemia. At the beginning of 2021, the list of approved marine-derived anticancer drugs consists of nine substances, five of which received approval within the last two years, demonstrating the rapid evolution of the field. The current book is a collection of scientific articles related to the exponentially growing field of anticancer marine compounds. These articles cover the whole field, from agents with cancer-preventive activity, to novel and previously characterized compounds with anticancer activity, both in vitro and in vivo, as well as the latest status of compounds under clinical development.</p>
