Sommario/riassunto	<p>We are currently experiencing a climate crisis that is associated with extreme weather events worldwide. Some of its most noticeable effects are increases in temperatures, droughts, and desertification. These effects are already making whole regions unsuitable for agriculture. Therefore, we urgently need global measures to mitigate the effects of climate breakdown as well as crop alternatives that are more stress-resilient. These crop alternatives can come from breeding new varieties of well-established crops, such as wheat and barley. They can also come from promoting underutilized crop species that are naturally tolerant to some stresses, such as quinoa. Either way, we need to gather more knowledge on how plants respond to stresses related to climate breakdown, such as heat, water-deficit, flooding high salinity, nitrogen, and heavy metal stress. This Special Issue provides a timely collection of recent advances in the understanding of plant responses to these stresses. This information will definitely be useful to the design of new strategies to prevent the loss of more cultivable land and to reclaim the land that has already been declared unsuitable.</p>

Sommario/riassunto	Lysias' 21st speech "On a charge of taking bribes" is an important example of Attic oratory that sheds significant light on Classical history and society. Delivered after the restoration of democracy in 402 B.C.E., this speech provides information that is critical for our understanding of the relationship between the Athenian demos and aristocrats, Athenian civic institutions (e.g., taxation, liturgies and conscription), religious beliefs, moral values, political behavior, and, in particular, of the legal and rhetorical treatment of embezzlement and bribery. It also supplies unique information about the military engagement of the Athenians at Aegospotami and the role of Alcibiades in the political life of Athens. Despite its importance, however, Lysias' speech has never been the subject of an extensive study in its own right. This volume seeks to fill that gap by presenting the first systematic commentary on this speech. The author puts much emphasis on its structure, strategy, and argumentation, focusing especially on the tension between the actual practices of the anonymous client of the logographer and civic ideals invoked in the present case. The book is intended to be of

interest to classicists, ancient historians and political theorists, but also to the general reader.
