Autore	Deni John R.
Titolo	The future of American landpower : does forward presence still matter? The case of the Army in the Pacific // John R. Deni
Pubbl/distr/stampa	Carlisle Barracks, PA : , : Strategic Studies Institute and U.S. Army War College Press, , 2014
Descrizione fisica	1 online resource (xi, 56 pages) : illustration, maps
Soggetti	United States Armed Forces East Asia United States Armed Forces Pacific Area United States Military policy 21st century East Asia Strategic aspects Pacific Area Strategic aspects
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from PDF title page (SSI, viewed June 6, 2014). "June 2014."
Nota di bibliografia	Includes bibliographical references (pages 44-56).

2. Record Nr.	UNIORUON00143747
Autore	CHING, Eugene
Titolo	201 [two hundred one] Chinese verbs fully compounds and phrases for everyday usage] / Eugene and Nora Ching
Pubbl/distr/stampa	Woodbury ((New York), : Barron's Educational Series, 1977
ISBN	08-12-00674-7
Descrizione fisica	XXIII, 264 p. ; 27 cm8
Classificazione	CIN II B
Altri autori (Persone)	CHING, Nora
Soggetti	Lingua cinese - Studi grammaticali - Verbi
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
3. Record Nr.	UNINA9910598264403321
Autore	Bertaccini Bruno
Titolo	ASA 2021 Statistics and Information Systems for Policy Evaluation : BOOK of SHORT PAPERS of the on-Site Conference
Pubbl/distr/stampa	Florence, : Firenze University Press, 2021 Florence : , : Firenze University Press, , 2021 ©2021
Edizione	[1st ed.]
Descrizione fisica	1 electronic resource (6 p.)
Collana	Proceedings e report
Altri autori (Persone)	FabbrisLuigi PetrucciAlessandra
Soggetti	Social research & statistics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia

The paper describes an exercise of classification of a subset of five-digit categories of the 2007 ATECO classification system of economic activities. The analysis is grounded on the hypothesis that economic sectors can be clustered according to the competency level required to human resources recently working in industries or services in Italy. The analysis may be useful to evaluate a possible relationship between economic development and education. The analysis consisted of a mapping and then a clustering of the Ateco categories according to the between-distribution dissimilarity of any possible couple of categories. The basic idea was to highlight the Ateco categories that require either more education than others or more education and working experience (human capital) than others, pinpointing, in particular, the categories that require larger percentages of tertiary education and those residing close to territorial hubs. The competency level was measured with a combination of educational attainment and in-service experience of Italian employees, as defined by Istat, the Italian statistical institute. The employees' educational level was evaluated with the frequency distribution of five (ordinal) classes of education of people employed in 2018 and 2019 in both private and public establishments and offices; the working experience with a logarithmic transform of the average number of in-service years of employees. The analysis highlighted both a sort of input-related classification of the economy and a supply-side classification of the labour market. The results are in line with the theory of the existence of a cluster of creative companies residing close to territorial hubs.
