Sommario/riassunto

A Dan Josselyn Memorial Publication The ninth and final volume in the C.B. Moore reprint series that covers archaeological discoveries along North American Waterways. Clarence B. Moore (1852-1936), a wealthy Philadelphia socialite, paper company heir, and photographer, made the archaeology of the Southeast his passion. Beginning in the 1870's, Moore systematically explored prehistoric sites along the major waterways of the region, from the Ohio River south to Florida and as far west as Texas, publishing his findings, at his own expense, with the Academy of Natural Sciences of Philadelphia.
