Sommario/riassunto

The multidisciplinary edited book *Visions and Strategies for a Sustainable Economy: Theoretical and Policy Alternatives* provides a thorough examination – at the theoretical and, especially, policy levels – of a number of key topics related to a sustainable economy and a better society. With important contributions by distinguished academics, the book presents alternative views, provides an assessment of contemporary realities in an era of ecological emergency, and offers visions, strategies, and realistic policies towards a better economy and society while paying special attention to a “green new deal” for different areas. Nikolaos Karagiannis is Full Professor of Economics at Winston-Salem State University, North Carolina (USA); invited visiting scholar at the University of Cambridge (UK); and the co-editor of *American Review of Political Economy*. He has published extensively in the areas of economic development, public sector economics, and macroeconomic policy analysis. Karagiannis is particularly interested in developmental state theory and policy. He is the author, co-author, and co-editor of 22 books and has published over 160 papers as refereed journal articles, book chapters, and op-eds. John E. King is Emeritus Professor at La Trobe University and Honorary Professor at Federation University Australia. His principal research interests are in the history of heterodox economic thought, especially Marxian political economy and post-Keynesian economics. King has published 115 papers in refereed journals and over 96 book chapters, and is the author, co-author, or editor of 32 books. Recent publications include *A History of American Economic Thought* (2018; with Samuel Barbour and James Cicarelli), *A Modern Guide to State Intervention* (2019; with Nikolaos Karagiannis), and *The Alternative Austrian Economics* (2019), dealing with socialist economic thought in Austria between 1900 and the present day.
