Sommario/riassunto	This book contains the first and second volume papers from the 8th International Conference on the History of Records and Archives (I-CHORA 8). Contributors present articles that propose new solutions

and aspirations for a new era in the technology of archives and recordkeeping. Topics cover rethinking the role played by archivists, and reframing recordkeeping practices that focus on the rights of the subjects of the records. This text appeals to students, researchers and professionals in the field. Previously previously as special issues in the journal: *Archival Science*: "Special Issue: Archives in a Changing Climate - Part I" and "Archives in a Changing Climate - Part II" Chapter "Displaced archives": proposing a research agenda is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.
