Sommario/riassunto	This new edition features updated information on all aspects of the diagnosis and management of ovarian cancer. Embracing knowledge from around the world, this multidisciplinary book discusses current approaches to ovarian cancer that have helped stabilize the rate of both incidences and fatality for the disease. The chapters focus on genetic screening and advances in management, including the optimization of chemotherapeutic agents, gene therapy, and the latest laparoscopic and robotic surgical techniques. Further chapters address psychosocial and quality-of-life issues as well. The book is a must-have resource for wide range of practitioners who care for patients with ovarian cancer

and researchers who study the disease.
