

1. Record Nr.	UNINA9910616384203321
Autore	Ceulemans Arnout
Titolo	The theory of the Jahn-Teller effect : when a boson meets a fermion // Arnout Ceulemans
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2022] ©2022
ISBN	9783031095283 9783031095276
Descrizione fisica	1 online resource (429 pages)
Disciplina	530.143
Soggetti	Interacting boson-fermion models Jahn-Teller effect Efecte Jahn-Teller Bosons Fermions Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Preface -- Contents -- Part I Bosons and Fermions -- 1 The Impossible Theorem -- Contents -- 1.1 The Jahn-Teller Theorem -- 1.2 Charge Density Analysis -- 1.2.1 Occupation of dz2 -- 1.2.2 Occupation of dx2-y2 -- 1.2.3 Sum and Difference Orbitals -- 1.2.4 Orthogonal and Unitary Combinations -- 1.3 Outlook -- References -- 2 Bosons and Fermions -- Contents -- 2.1 Bosons -- 2.1.1 The Schrödinger Formalism -- 2.1.2 The Dirac Formalism -- 2.1.3 The Bargmann Mapping -- 2.2 Fermions -- 2.2.1 Fermion Operators -- 2.2.2 One-Electron Interactions -- 2.2.3 Quasi-Spin -- References -- 3 Boson-Fermion Interactions -- Contents -- 3.1 The Jahn-Teller Effect in a Triangular Molecule: A Toy Model -- 3.1.1 The Hückel Hamiltonian -- 3.1.2 Fermions: Trigonal Molecular Orbitals -- 3.1.3 Bosons: Vibrational Modes -- 3.1.4 Coupling Coefficients -- 3.2 Degeneracies and Time Reversal -- 3.2.1 Time Reversal -- 3.2.2 Irreducible Representations of the First Kind and Orthogonal Lie Groups -- 3.2.3 Irreducible Representations of the Second Kind and Symplectic Lie

Groups -- 3.2.4 Irreducible Representations of the Third Kind -- 3.3
 The Jahn-Teller Hamiltonian -- 3.4 Selection Rules -- 3.4.1 Space
 Symmetry -- 3.4.2 Time Reversal Symmetry -- 3.4.3 Hole-Particle
 Exchange Symmetry -- 3.5 Proof of the Jahn-Teller Theorem -- 3.5.1
 History -- 3.5.2 Where Do Degeneracies Come From? -- 3.5.2.1 Cosets
 and the Positional Representation -- 3.5.2.2 Doubly Transitive Orbits
 -- 3.5.3 Degenerate Representations and Jahn-Teller Modes -- 3.5.4
 Jahn-Teller Activity in Simplexes -- References -- Part II Dynamic
 Symmetries -- 4 The Rabi Hamiltonian -- Contents -- 4.1 The
 Adiabatic Potential -- 4.2 The Quantum Model -- 4.3 Bargmann
 Mapping of the Wave Equations -- 4.4 Eigenvalues -- 4.4.1
 Classification of the Roots -- 4.4.2 Recurrence Relations and
 Transcendental Function.
 4.4.3 The Rabi Spectrum -- 4.5 The Quantization of the Rabi
 Hamiltonian -- 4.6 Analyticity -- 4.7 Inversion Tunneling in Ammonia
 -- References -- 5 The $E \times e$ Orbital Doublet -- Contents -- 5.1 The
 Quantum Model -- 5.2 Dynamic Symmetries -- 5.2.1 Boson Symmetry
 -- 5.2.2 Fermion Symmetry -- 5.2.3 Coupled Symmetries -- 5.3 The
 Canonical Form of the Wave Equation -- 5.4 Recurrence Relationships
 -- 5.5 Results -- 5.6 Discussion -- 5.7 Application: Na_3 and the $(E+A)$
 $\times e$ Hamiltonian -- References -- 6 The Spin Quartet $8 \times (e+t_2)$ System
 and the Symplectic Group $Sp(4)$ -- Contents -- 6.1 Historical Note:
 Judd and Reik -- 6.2 The Hamiltonian -- 6.2.1 The Static Case -- 6.2.2
 The Dynamic Hamiltonian -- 6.3 $Sp(4)$ Fermion Symmetry -- 6.4 $SO(5)$
 Boson Symmetry -- 6.5 The $8 \times (e+t_2)$ Dynamic Equations -- 6.6 The
 $8 \times t_2$ Subsystem -- 6.6.1 $SO(3)$ Invariance -- 6.6.2 Dynamic
 Equations -- 6.7 Application -- 6.7.1 ReF_6 -- 6.7.2 IrF_6 -- References
 -- 7 Ansatz for the Jahn-Teller Triplet Instability -- Contents -- 7.1 SO
 (5) Symmetry and the Five-Dimensional Harmonic Oscillator -- 7.1.1 SU
 (5) $SO(5)$ Symmetry Breaking -- 7.1.2 $SO(5)$ $SO(3)$ Symmetry
 Breaking -- 7.2 The Hamiltonian -- 7.3 The Vibrating Sphere -- 7.4
 Boson Functions -- 7.4.1 S States -- 7.4.2 D States -- 7.4.3 F States --
 7.5 The Ansatz -- 7.6 The Jahn-Teller Equations -- 7.7 Solution -- 7.8
 Ansatz for Vibronic D States -- 7.9 Application -- 7.10 Conclusion --
 References -- 8 The Icosahedral Quartet and $SO(9)$ $SO(4)$ Symmetry
 Breaking -- Contents -- 8.1 Introduction -- 8.2 Preamble:
 Hyperspherical Symmetry -- 8.3 The Hamiltonian -- 8.4 The Vibrations
 of the Four-Dimensional Hypersphere -- 8.5 $SO(9)$ $SO(4)$ Symmetry
 Breaking -- 8.5.1 $(0,0)$ Modes -- 8.5.2 $(1,1)$ Boson Modes -- 8.5.3
 Modes with Seniority ≥ 4 -- 8.6 The Ansatz: Vibronic $(12,12)$
 Levels -- 8.7 Icosahedral Symmetry Lowering.
 8.8 Application: C_{20} and C_{80} Fullerenes -- 8.8.1 C_{20} -- 8.8.2 C_{80} --
 References -- 9 $SO(14)$ $SO(5)$ Symmetry Breaking and the Jahn-Teller
 Quintet Instability -- Contents -- 9.1 Dynamic Symmetries -- 9.2
 Descent to Spherical Symmetry -- 9.2.1 Branching Rules for $SO(5)$ $SO(3)$
 -- 9.2.2 The $L=2$ Case -- 9.2.3 The $L=4$ Case -- 9.3 Descent to
 Permutational Symmetry -- 9.3.1 The Icosahedral Hamiltonian -- 9.3.2
 The Hexateron -- 9.4 Correlation Between the Spherical and the
 Permutational Scheme -- 9.5 Application: The Ground State of C_{60}^+
 Cation -- References -- 10 Jahn's and Teller's Last Case: The Spinor
 Sextet -- Contents -- 10.1 Group Theory of the Sextet Spinor --
 10.1.1 The Unitary Symplectic Group $USp(6)$ -- 10.1.2 The $SO(14)$
 Group of the Bosons -- 10.2 The $9 \times (g+2h)$ Problem -- 10.2.1 The
 Hamiltonian -- 10.2.2 Diagonalization -- 10.2.3 The Equal Coupling
 Case -- 10.3 Chemical Applications -- 10.4 Overview -- 10.4.1 Orbital
 Representations: $SO(N)$ $SO(n)$ -- 10.4.2 Spinor Representations: $SO(N)$
 $USp(2n)$ -- References -- Part III Topography -- 11 Conical
 Intersections and Quantum Fields -- Contents -- 11.1 The Berry Phase

-- 11.1.1 The Quantal Phase Factor Accompanying Adiabatic Changes
-- 11.1.1.1 Single-Valued Basis Functions -- 11.1.1.2 Real Basis Sets
-- 11.1.2 Holonomy -- 11.2 The Exe Jahn-Teller Case -- 11.2.1 Berry
Phase for the Exe Case -- 11.2.2 The Dirac Monopole Analogy --
11.2.3 Berry Phase and Angular Momentum -- 11.3 Quadruple Spin
Degeneracy and the Instanton -- 11.3.1 The 8 \times 2g Hamiltonian --
11.3.2 The 8 \times (eg+t2g) Hamiltonian -- References -- 12 Topography
and Chemical Reactivity -- Contents -- 12.1 Tools -- 12.1.1 The
Epikernel Principle -- 12.1.2 The Isostationary Function -- 12.1.3 Proof
of the Epikernel Principle -- 12.1.3.1 Only One Irrep -- 12.1.3.2
More than One Irrep -- 12.1.3.3 Illustration: The \times (1+2) Problem.
12.2 Orbital Doublets -- 12.2.1 The \times (b1+b2) System -- 12.2.2 The
Exe System -- 12.2.3 The Pentagonal E1 \times e2 Problem -- 12.3 The
Cubic T \times (e+t2) Problem -- 12.3.1 Second-Order Warping Terms --
12.3.2 Chemical Reactivity: The Isomerization of Fe(CO)₄ -- 12.4 The
Icosahedral T \times h System -- 12.5 The Icosahedral G \times g+h Quartet
System -- 12.5.1 The Isostationary Function -- 12.5.2 Tetrahedral
Minima -- 12.5.3 Trigonal Minima -- 12.6 The Icosahedral H \times (g+2h)
Quintet System -- 12.6.1 The Isostationary Function -- 12.6.2
Pentagonal Minima -- 12.6.3 Trigonal Minima -- 12.7 The Icosahedral
9 \times (g+2h) Sextet System -- 12.7.1 The G-Type Subspace -- 12.7.2
The H Subspace -- 12.7.2.1 The FH₂ Hamiltonian at =0 -- 12.7.2.2
Trough Solution: T1 \times 7: 100.893 -- 12.7.2.3 Trough Solution: T2
 \times 6: 220.8934 -- References -- Epilogue -- A The Displaced
Oscillator -- Contents -- A.1 Hamiltonian -- A.2 The Displacement
Operator -- A.3 Eigenfunction of the Annihilation Operator -- A.4
Matrix Representation of the Displaced Oscillator -- References -- B
Derivation of the Coupling Coefficients -- Contents -- B.1 Clebsch-
Gordan Coupling Coefficients -- B.2 How to Calculate Coupling
Coefficients -- B.3 Icosahedral States -- References -- C SU(n), SO(n),
Sp(2n) Lie Algebras -- Contents -- C.1 The Special Unitary Group SU(n)
-- C.2 The Special Orthogonal Group SO(n) -- C.3 The Symplectic
Group Sp(2n) -- References -- D The Birkhoff Transformation --
Contents -- D.1 The Birkhoff Theorem -- D.2 Transformation of the
Rabi Equation to the Standard Birkhoff Form -- D.3 Recursion Formulas
for the Rabi Case -- D.4 Summary -- References -- E Dirac's Monopole
-- Contents -- E.1 The Field of a Monopole -- E.2 The Vector Potential
-- References -- F Yang's Monopole -- Contents -- F.1 Introduction --
F.2 The Tensor Potential A -- F.3 The Field Tensor F -- References.
G Topological Graph Theory -- Contents -- G.1 Graphs -- G.2 Rings --
G.3 Faces -- References -- Compound Index -- Subject Index.
