

1. Record Nr.	UNINA9910617319103321
Autore	Anomaly Jonathan
Titolo	Creating future people : the ethics of genetic enhancement / / Jonathan Anomaly
Pubbl/distr/stampa	Taylor & Francis, 2020 New York, NY : , : Routledge, , 2020 ©2020
ISBN	1-00-301480-1 1-000-76978-X 1-003-01480-1 1-000-76976-3
Descrizione fisica	1 online resource (127 pages)
Disciplina	174.957
Soggetti	Genetic engineering - Moral and ethical aspects Genetic Engineering Genetic Engineering - ethics Organisms, Genetically Modified Genome, Human
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	"Creating Future People offers readers a fast-paced primer on how new genetic technologies will enable parents to influence the traits of their children, including their intelligence, moral capacities, physical appearances, and immune systems. It deftly explains the science of gene editing and embryo selection, and raises the central moral questions with colorful language and a brisk style. Jonathan Anomaly takes seriously the diversity of preferences parents have, and the limits policymakers face in regulating what could soon be a global market for reproductive technology. He argues that once embryo selection for complex traits happens it will change the moral landscape by altering the incentives available to parents. All of us will take an interest in the traits everyone else selects, and this will present coordination problems

that previous writers on genetic enhancement have failed to consider. Anomaly navigates difficult ethical issues with vivid language and scientifically-informed speculation about how genetic engineering will transform humanity. Key Features: Offers clear explanations of scientific concepts Explores important moral questions without academic jargon Brings discoveries from different fields together to give us a sense of where humanity is headed"--
