

1. Record Nr.	UNINA9910619277803321
Autore	Partridge Tristan
Titolo	Energy and Environmental Justice : Movements, Solidarities, and Critical Connections / / by Tristan Partridge
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Palgrave Macmillan, , 2022
ISBN	9783031097607 3031097602 9783031097591 3031097599
Edizione	[1st ed. 2022.]
Descrizione fisica	1 online resource (170 pages)
Disciplina	929.374 363.7
Soggetti	Environmental sciences - Social aspects Environmental geography Science - Social aspects Energy policy Environmental Social Sciences Integrated Geography Science and Technology Studies Energy Policy, Economics and Management
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Chapter 1: Energy from the perspective of Environmental Justice -- Chapter 2: Transitions beyond crisis: pluralism, restoration, degrowth -- Chapter 3: A critical energy research agenda.
Sommario/riassunto	"Energy and Environmental Justice has forced me to completely rethink energy justice from the ground up. Tristan Partridge has produced a highly original volume that will breathe new life into the field and will set the tone for the next generation of scholars." --David N. Pellow, author of What Is Critical Environmental Justice? "Partridge's synthesis is incredibly important, and usefully explains what justice, transition, and degrowth means grounded in everyday struggles." --Julie Sze,

author of *Environmental Justice in a Moment of Danger*. “This concise handbook should be required reading for every student in environmental studies and related fields. It helpfully reconnects energy research with the radical perspectives, activist roots, Indigenous insights, and key concepts required for building the future we need.” – Corrie Grosse, author of *Working across Lines: Resisting Extreme Energy Extraction*. This book reconnects energy research with the radical, reflexive, and transformative approaches of Environmental Justice. Global patterns of energy production and use are disrupting the ecosystems that sustain all life, disproportionately affecting marginalized groups. Addressing such injustices, this book examines how energy relates to structural issues of exploitation, racism, colonialism, extractivism, the commodification of work, and the systemic devaluing of diverse ‘others.’ The result is a new agenda for critical energy research that builds on a growing global movement of environmental justice activism and scholarship. Throughout the book the author reframes ‘transitions’ as collaborative projects of justice that demand societal shifts to more equitable and reciprocal ways of living. This book will be an invaluable resource for students, scholars, and practitioners interested in transforming energy systems and working collectively to build just planetary futures. Tristan Partridge is a Research Fellow at the University of California, Santa Barbara.
