1. **Record Nr.** UNINA9910623982103321

   Autore Harman Mark

   Titolo Proceedings of the 44th International Conference on Software Engineering : Software Engineering in Practice / / Mark Harman and Heather Miller

   Pubbl/distr/stampa New York : , : Association for Computing Machinery, , 2022

   Descrizione fisica 1 online resource (371 pages) : illustrations

   Disciplina 004

   Soggetti Computer science
   Software engineering
   Electronic data processing

   Lingua di pubblicazione Inglese

   Formato Materiale a stampa

   Livello bibliografico Monografia

   Sommario/riassunto It is our great pleasure to welcome you to the Software Engineering in Practice (SEIP) Track 2022. The Software Engineering in Practice Track is the premier venue for researchers and practitioners to discuss insights, innovations and solutions to concrete software engineering problems. SEIP provides a unique forum for making connections, exchanging ideas, fostering innovations, and forging long-term collaborations for addressing software engineering research that impacts directly on practice. SEIP has gathered submissions from highlyqualified industrial and research participants who are eager to communicate and share common interests in software engineering. Submissions are evaluated primarily on potential impact and real-world focus: each submission aims to describe a problem of practical importance, explain how the problem was investigated and in what context, and to present evidence for the paper's conclusions.
