

1. Record Nr.	UNINA9910623997003321
Autore	Huawei Technologies Co Ltd
Titolo	Cloud Computing Technology // by Huawei Technologies Co., Ltd
Pubbl/distr/stampa	Singapore : , : Springer Nature Singapore : , : Imprint : Springer, , 2023
ISBN	9789811930263 9811930260
Edizione	[1st ed. 2023.]
Descrizione fisica	1 online resource (XIII, 378 p. 1 illus.)
Disciplina	004.6782
Soggetti	Cloud computing Cloud Computing Computació en núvol Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Chapter 1. Introduction to Cloud Computing -- Chapter 2. Cloud Computing System -- Chapter 3. Virtualization Technology -- Chapter 4. Network Basics in Cloud Computing -- Chapter 5. Storage Basics in Cloud Computing -- Chapter 6. OpenStack -- Chapter 7. Container Technology -- Chapter 8. Cloud Computing Development Trends.-.
Sommario/riassunto	This open access book introduces cloud computing and related technologies from the concept, technology, and architecture of cloud computing, combined with typical application cases of cloud; provides students with a more complete knowledge framework in the field of cloud computing; and lays the foundation for future research, development, and further study in cloud computing, big data, and other related fields. As the world's leading provider of ICT (information and communication technology) infrastructure and intelligence terminals, Huawei's products are already available in a number of areas, including connectivity, security, wireless, storage, cloud computing, intelligent computing, and artificial intelligence.

### Sommario/riassunto

This book constitutes the proceedings of the Joint IAPR International Workshops on Structural, Syntactic, and Statistical Pattern Recognition, S+SSPR 2024, which took place in Venice, Italy, during September 9-11, 2024. The 19 full papers presented in this volume were carefully reviewed and selected from 27 submissions. The proceedings focus on pattern recognition, including classification and clustering, deep learning, structural matching and graph-theoretic methods, and multimedia analysis and understanding.
