Sommario/riassunto

Through a mixture of concepts and examples, the second edition of this book demystifies the variety of elements of financial accounting and uncovers the need-to-know information for certification in this field. This book covers the two aspects of financial statement analysis, namely quantitative and non-quantitative analysis. Unique to the second edition, the book will also cover Non-GAAP metrics and valuation accounting. Concluding with helpful and updated case studies, the book will appeal to students and academics of financial accounting. Felix I. Lessambo is Adjunct Associate Professor at Fordham University, USA, where he teaches Corporate Tax and Audit & Assurance Services. He was an Associate Professor at Central Connecticut State University School of Business where he taught Financial Statements Analysis, Global Financial Reporting, and Law & Finance. He has practiced international tax, transfer pricing, and alternative investment management where he structured and advised on hedge funds and private equity cross-border transactions. He is the author of several books in finance including The International Banking System, The International Corporate Governance System, International Financial Institutions and Their Challenges, International Aspects of US Taxation System, Audit-Assurance Services & Forensics, Financial Statements: Analysis & Reporting, The US Banking System, Mergers in the Global Markets, International Finance, The US Mergers & Acquisitions: Legal & Financial Aspects, and International Project Finance: The Public-Private Partnership.
