

1. Record Nr.	UNINA9910624501403321
Autore	Stucken, Rudolf
Titolo	Vermögensteuern / Rudolf Stucken
Pubbl/distr/stampa	Bonn am Rhein, : Stollfuß, 1954
Descrizione fisica	16 p. ; 21 cm
Collana	Schriftenreihe des : Institut "Finanzen und Steuern" ; 29
Disciplina	336.22
Locazione	FGBC
Collocazione	XIV I 1 (29)
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia
2. Record Nr.	UNINA9910447051603321
Autore	Loeckx Renilde
Titolo	Cold War Triangle : How Scientists in East and West Tamed HIV // Renilde Loeckx
Pubbl/distr/stampa	Leuven University Press, 2017 Baltimore, Maryland : , : Project Muse, , 2017 ©2017
ISBN	9789461662453 9461662459
Descrizione fisica	1 online resource (1 PDF (186 pages) :) : portraits
Disciplina	616.9792
Soggetti	AIDS (Disease) - Research - Political aspects HIV infections - Research - Political aspects AIDS (Disease) - International cooperation HIV infections - International cooperation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia

Note generali	Issued as part of book collections on Project MUSE.
Nota di bibliografia	Includes bibliographical references (pages 175-180) and index.
Nota di contenuto	Introduction -- I. Leuven : a hotbed for antiviral research -- II. Behind the Iron Curtain -- III. Strange bedfellows : a Czech chemist and a Flemish virologist -- IV. The sixties in Leuven and Prague -- V. Enzymes : the secret of life as chemistry -- VI. From interferon to nucleosides -- VII. Breaking away from interferon -- VIII. The first antiviral drugs -- IX. Aids emerges in the shadow of the Cold War -- X. From passivity to action -- XI. First attempts to halt the epidemic -- XII. Finding the best therapy : the one-a-day-pill -- Epilogue : of scientists and crusaders.
Sommario/riassunto	The extraordinary story of scientists in East and West combatting HIV. A small group of scientists were doggedly working in the field of antiviral treatments when the AIDS epidemic struck. Faced with one of the grand challenges of modern biology of the twentieth century, scientists worked across the political divide of the Cold War to produce a new class of antivirals. Their molecules were developed by a Californian start-up together with teams of scientists at the Rega Institute of KU Leuven and the Institute of Organic Chemistry and Biochemistry (IOCB) of the Academy of Sciences in Prague. These molecules became the cornerstone of the blockbuster drugs now used to combat and prevent HIV. Cold War Triangle gives an insight into the human face of science as it recounts the extraordinary story of scientists in East and West who overcame ideological barriers and worked together for the benefit of humanity.
