Sommario/riassunto	Innovation has moved through a range of revolutionary epochs, but there is no clear picture of how, or even if, innovation can be managed. This book explores the models, methods and metrics of innovation analysis in the context of a single centre: the Global Oilseeds Complex centred in Saskatoon, Canada. It is a single, coherent volume that

outlines the theory and practices related to innovation, offering a critical assessment of the strengths and weaknesses of the different approaches, backed up with empirical evidence.
