| 1. Record Nr.           | UNINA9910627240203321   |
| Titolo                  | Glycobiology of the nervous system // edited by Cara-Lynne Schengrund and Robert K. Yu  |
| Pubbl/distr/stampa      | Cham, Switzerland : , : Springer, , [2023]<br>©2023   |
| ISBN                    | 3-031-12390-5   |
| Edizione                | [Second edition.]   |
| Descrizione fisica      | 1 online resource (506 pages)   |
| Collana                 | Advances in Neurobiology ; ; v.29   |
| Disciplina              | 572.567   |
| Soggetti                | Glycoconjugates<br>Neurobiology   |
| Lingua di pubblicazione | Inglese   |
| Formato                 | Materiale a stampa  |
| Livello bibliografico   | Monografia  |
| Note generali           | Includes index.   |
| Nota di contenuto       | Intro -- Preface -- Postscript: In Memoriam -- Contents -- Chapter 1: Introduction to the Complexity of Cell Surface and Tissue Matrix Glycoconjugates -- 1 Introduction -- 2 Monosaccharides: Building Blocks of Glycans -- 3 Formation of Oligosaccharides -- 4 Classification of Glycans -- 5 Structural Features of N-Glycans -- 6 Structural Features of O-Glycans -- 7 Biosynthesis of N- and O-Glycans -- 8 Glycosphingolipids -- 9 Structural Features of the Glycan Moieties of Glycosphingolipids -- 10 Synthesis and Functions of the Glycan Moieties of Glycolipids -- 11 Glycosylphosphatidylinositol Anchors: A Special Group of Glycolipids -- 12 Glycosaminoglycans and Proteoglycans -- 13 Glycan-Protein Interactions -- 14 Glycans of Cell Surface Glycoconjugates Perform a Variety of Functions -- 15 Summary -- References -- Chapter 2: Cells of the Central Nervous System: An Overview of Their Structure and Function -- 1 Introduction -- 2 Neurons -- 2.1 Neuronal Cell Body -- 2.2 Cytoskeleton -- 2.3 Dendrites -- 2.4 Axon -- 2.5 Synapse -- 3 Supporting Cells -- 3.1 Astrocytes -- 3.2 Oligodendrocytes -- 3.3 Microglia -- 3.4 NG2 Cells (Polydendrocytes) -- 3.5 Ependymal Cells -- 4 Extracellular Matrix -- 5 Concluding Remarks -- References -- Chapter 3: Synthesis, Processing, and Function of N-Glycans in N-Glycoproteins -- 1 Introduction -- 2 N-glycans Are First Born on a Lipid and Then Transferred "En Bloc" onto the Nascent N-glycoprotein in the ER -- 3 Trimming, Reglycosylation, |

and Remodeling: There Are Many Ways of N-glycoprotein Processing in the ER and Golgi -- 4 The Essential Toolbox of a Glycobiologist: A Brief History of the Discovery of N-glycoprotein Biosynthesis Inhibitors and Their Impact on Our Understanding of N-glycan Processing.

5 Sweetening the Bond or Sugar-Coating Bad News: Recent Advances in the Role of N-glycans for Virus Infections and Immune Responses --

6 Sweet Encounters of Glycoproteins and Glycolipids: N-glycans Affect the Subcellular Distribution and Complex Formation of Enzymes

in Glycolipid Biosynthesis -- 7 Conclusions and Epilogue: The Tale of the Tail That Wags the Dog -- References -- Chapter 4: Synthesis

of O-Linked Glycoconjugates in the Nervous System -- 1 Introduction -- 2 Biosynthesis of O-Linked Proteins -- 2.1 O-GalNAcylation -- 2.2

O-Mannosylation -- 2.3 O-GlcNAcylation -- 2.4 O-Xylosylation -- 2.5 O-Fucosylation -- 2.6 O-Glucosylation -- 3 Biosynthesis of O-Linked

Lipids -- 3.1 Glucosylceramide and Glycosphingolipids -- 3.2

Galactosylceramide and Glycosphingolipids -- 3.3 GlcCer and GM3 Synthase Deficiency in Human and Mouse -- 3.4 Other O-Linked

Lipids - New Glucose-Related Lipids -- 4 Conclusions -- References -- Chapter 5: Chemistry and Function of Glycosaminoglycans

in the Nervous System -- 1 Introduction -- 2 Glycosaminoglycan

Structure and Chemistry -- 2.1 Chondroitin Sulfate (CS) -- 2.1.1

Structure and Chemistry -- 2.1.2 Synthesis and Modification of CS

Chains -- 2.1.3 CS Proteoglycans (CSPGs) in Brain -- 2.2 Dermatan

Sulfate (DS) -- 2.3 Heparin -- 2.4 Heparan Sulfate (HS) -- 2.4.1

Structure and Chemistry -- 2.4.2 Synthesis and Modification of HS

Chains -- 2.4.3 Heparan Sulfate Proteoglycans (HSPGs) in Brain -- 2.5

Keratan Sulfate (KS) -- 2.6 Hyaluronan (HA) -- 3 Function of GAGs

in the Brain -- 3.1 GAG Interactions and Binding Partners -- 3.2 GAG

Functions During Brain Development -- 3.2.1 Neural System

Development and Lineage Specification -- 3.2.2 Brain Patterning --

3.2.3 Neurite Outgrowth, Axonal Pathfinding and Migration -- 3.2.4

Differentiation and Stem-Cell Niche -- 3.2.5 Synaptic Plasticity.

3.3 GAG Function in CNS-Associated Disorders and Injury -- 3.3.1

Injury Response -- 3.3.2 Neurological Disorders -- 3.3.3 Inflammation

-- 3.3.4 Tumorigenesis -- 4 Concluding Remarks -- References --

Chapter 6: Structural Analysis of Oligosaccharides and Glycoconjugates

Using NMR -- 1 Introduction -- 2 Basic NMR Phenomena -- 3 Chemical

Shifts as Structural Probes -- 4 Through "BOND" and Through "SPACE"

Interactions -- 5 Relaxation and Molecular Motion -- 6 Paramagnetic

Effects as Sources of Long-Distance Information -- 7 Chemical

Exchange: Dynamic Aspects in NMR -- 8 NMR Tools for Intermolecular

Interaction Analysis -- 8.1 Oligosaccharide-Protein Interactions -- 8.2

Protein Binding to Glycolipid Clusters -- 9 Liaisons Between NMR

and Computation -- References -- Chapter 7: Glycans

and Carbohydrate-Binding/Transforming Proteins in Axon Physiology

-- 1 Introduction -- 2 Axon Determination/Early Neuronal

Differentiation -- 3 Axon Guidance -- 3.1 Axon Guidance by

Glycosylated Cell Adhesion Molecules (CAMs) -- 3.2

Glycosaminoglycans in Axon Guidance -- 3.3 Galectins and Their

Interactions with Guidance Cues in the Adult Olfactory System -- 4

Axon/Glia Interactions -- 5 Nerve Impulse Generation/Transmission --

5.1 Voltage-Gated Ion Channels -- 5.2 Voltage-Gated Sodium

Channels -- 5.3 Voltage-Gated Potassium Channels -- 5.4 Voltage-

Gated Calcium Channels -- 5.5 O-Linked -N-Acetylglucosaminylation

of AIS Proteins -- 6 Axon Regeneration -- 7 New Perspective in CNS

Regulation Through Glycan-Lectin Interactions in the Microbiota-Gut-

Brain Axis -- References -- Chapter 8: Neurological Consequences

of Congenital Disorders of Glycosylation -- 1 Introduction -- 2 Classification -- 2.1 N-Linked Glycosylation Defects -- 2.2 O-Linked Glycosylation Defects -- 2.3 Disorders of Glycosylphosphatidylinositol (GPI) Anchor Biosynthesis. 2.4 Disorders of Glycosphingolipid (GSL) Glycosylation -- 2.5 Disorders of Multiple Glycosylation Pathways -- 2.6 Recently Described CDG with Neurological Presentation -- 3 Markers/Biochemical Abnormalities -- 4 Congenital Brain Abnormalities -- 5 Epilepsy -- 6 Developmental Delay/Intellectual Disability -- 7 Ataxia -- 8 Neuromuscular Presentation -- 9 Spasticity -- 10 Autistic Features -- 11 Extrapyrmidal Manifestation -- 12 Treatment Options -- 13 Conclusions and New Perspectives -- References -- Chapter 9: Brain O-GlcNAcylation: From Molecular Mechanisms to Clinical Phenotype -- 1 Introduction -- 2 O-GlcNAc Is a Ubiquitous Monosaccharide That Cycles Onto and Off Serine and Threonine -- 2.1 O-GlcNAc Is Not Elongated to Yield Complex Oligosaccharides -- 2.2 O-GlcNAc Is Mostly Expressed on the Inside of Cells in Multicellular Organisms -- 2.3 O-GlcNAc Can Be Dynamically Attached and Removed -- 3 O-GlcNAc Is Added to Proteins by OGT and Removed by OGA -- 3.1 Only Two Enzymes Regulate the Cycling of O-GlcNAc -- 3.2 O-GlcNAc Transferase -- a Highly Conserved Glycosyltransferase Present in the Nucleus & Cytosol -- 3.3 O-GlcNAcase -- a Cytosolic O-GlcNAc Hydrolase with Neutral pH Optima -- 4 O-GlcNAc Is Highly Expressed in the Nervous System -- 4.1 O-GlcNAc Is Found Throughout the Brain -- 4.2 Thousands of Neuronal Proteins Are Modified by O-GlcNAc -- 4.3 O-GlcNAc Regulates Diverse Cellular Processes -- 5 O-GlcNAc Is Essential for Brain Function -- 5.1 Early and Late Brain Development Depends Upon O-GlcNAc Cycling -- 5.2 O-GlcNAc Underlies Learning and Memory -- 5.3 Impaired O-GlcNAc Cycling Contributes to Neurodegenerative Disease -- 5.4 O-GlcNAc Mediates Central Control of Metabolism -- 6 Summary and Outlook -- References -- Chapter 10: Ganglioside Microdomains on Cellular and Intracellular Membranes Regulate Neuronal Cell Fate Determination. 1 Introduction -- 2 Ganglioside Multifunction in Cell Membranes and Intracellular Organelles -- 3 Ganglioside microdomains for Neuronal Cell Fate Determination -- 4 GD3-EGFR -- 5 GD3 Regulates Mitochondrial Dynamics by Interacting with Drp1 -- 6 GD3 Amplifies SOX2 Expression and GM1 Promotes DCX Expression -- 7 GM1 Binds to Neuronal Gene Promoter Regions -- 8 Nuclear GM1 Promotes Neuronal Gene Expression -- 9 Other Gangliosides for NSC Specification -- 10 Future Studies -- References -- Chapter 11: Gangliosides and Cell Surface Ganglioside Metabolic Enzymes in the Nervous System -- 1 Gangliosides -- 1.1 Ceramide: The Lipid Portion of Gangliosides -- 1.2 The Oligosaccharide Portion of Gangliosides -- 2 Gangliosides and Membrane Organization -- 3 Metabolic Pathways of Gangliosides -- 4 Plasma Membrane-Associated Enzymes and Ganglioside Pattern -- 5 Sialidases, Sialyltransferases and Plasma Membrane Sialidase Neu3 -- 6 -Hexosaminidase and N-Acetylgalactosaminyltransferase -- 7 -Glucocerebrosidase -- 8 -Galactosidase -- 9 Membrane Dynamics: A Non-canonical Pathway Involved in the Establishment of the GSL Profile at the Plasma Membrane -- 10 Conclusions -- References -- Chapter 12: Neuronal Ganglioside and Glycosphingolipid (GSL) Metabolism and Disease -- 1 Historical Aspects of Structure, Location and Function of GSLs -- 2 Significance and Function of Neuronal GGs -- 3 Intracellular Pathways of GG and GSL Metabolism -- 4 Emerging Concepts of GSL & GG Metabolism at Organellar Membranes -- 5 Emerging Topology

of Glycolipid Biosynthesis -- 6 Generation of Cell-Type-Specific  
Ganglioside Patterns -- 7 Enzyme Catalysis at Membrane Surfaces -- 8  
GSL Biosynthesis and Salvage Pathways -- 8.1 Ceramide Synthesis --  
8.2 Ganglioside Synthesis and Function -- 9 Inherited Errors of GG  
Biosynthesis -- 10 Remodeling and Recycling of Cell Surface  
Gangliosides.  
11 Concepts of the Constitutive Degradation of Gangliosides  
and Glycosphingolipids at ILVs.
