Nota di contenuto	Estimating Impacts and Cost of Air Pollution due to Road Infrastructure Projects -- Benefits from active transportation - A case study of Bangalore Metropolitan Region -- Framework for evaluating traffic impact of a new large commercial land use -- A case study from Bengaluru, India -- Influence of Connectivity of Streets on the Urban Form and Sprawl -- Sustainability Assessment of Biomass within Biofuel Supply Chain in Transport Sector using Circular Economy Framework -- Environmental capacity of roads under mixed traffic conditions -- Use of Waste plastic in Bituminous Mix and its Impact on Performance and Economy of Road.
Sommario/riassunto	This book comprises the proceedings of the Sixth International Conference of Transportation Research Group of India (CTRG2021) focusing on emerging opportunities and challenges in the field of transportation of people and freight. The contents of the volume include characterization of conventional and innovative pavement materials, operational effects of road geometry, user impact of multimodal transport projects, spatial analysis of travel patterns, socio-

economic impacts of transport projects, analysis of transportation policy and planning for safety and security, technology enabled models of mobility services, etc. This book will be beneficial to researchers, educators, practitioners and policy makers alike.
