

1. Record Nr.	UNINA9910627259103321
Titolo	The City of Care : Strategies to Design Healthier Places // edited by Anna Anzani, Francesco Scullica
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2023
ISBN	3-031-14608-5
Edizione	[1st ed. 2023.]
Descrizione fisica	1 online resource (229 pages)
Collana	Springer Series in Design and Innovation, , 2661-8192 ; ; 26
Disciplina	307.1216
Soggetti	Well-being Technological innovations Sociology, Urban Public health Well-Being Innovation and Technology Management Urban Sociology Public Health
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Care and dwelling culture -- Ethics of care and reuse of urban space -- Post-COVID interiors in the city of care -- Imagination as a design tool for a mental wellbeing urbanism -- Hybrid spaces for a new dimension of care -- Cities of proximity. From the neighborhood to the world -- Learning from COVID 19. A comparison of innovative design solutions for human-centred healthcare facilities -- Who says hospitals are ugly? Evolution and trends of architectures for health -- Technological Low Hanging Fruits involved in combating the COVID 19 pandemic -- Capsules of Health in the City.
Sommario/riassunto	The book explores care as a transition strategy to a healthier and more sustainable world. After the lesson learned from the pandemic, health as a fundamental human right is increasingly related to a care component: caring for sick people, persons with disabilities, elders, migrants and refugees, women and children, caring for bodies, minds, cities and nature. Endorsing the care system as a female knowledge

based on complexity, flexibility, management of the unexpected, sense of responsibility, the project culture can extract this paradigm from the domestic perimeter, bring outside and make it accessible to all in work, politics, relationships, places and communities. The systemic connection between planet and people wellbeing will be grasped through a transdisciplinary perspective that allows to deal with the city of care at a mental, physical, social and global level. The first section addresses care and interior space, dealing with dwelling, working, proximity and cities on a human scale, with a particular attention to the post Covid conditions. The second section deals with healthcare design, the evolution and trend of healing spaces, the influence of technology and robotics on inclusive design processes. The third section considers a social care attitude and deals with the multiethnic urban dimension, care and creativity in design, society and relationships, the right to health of immigrant people.
