Sommario/riassunto	This book gathers the latest advances, innovations, and applications in the field of environmental and construction engineering, as presented by international researchers at the XXV International Scientific Conference "Construction: The Formation of Living Environment", held in Moscow, Russia on April 20-22, 2022. It covers highly diverse topics, including sustainable innovative development of the construction industry, building materials, reliability of buildings and constructions and safety in construction, modelling and mechanics of building structures, engineering and smart systems in construction, climate change and urban environment. The contributions, which were selected by means of a rigorous international peer-review process, highlight numerous exciting ideas that will spur novel research directions and foster multidisciplinary collaborations.
