| Sommario/riassunto      | Current Issues in Language Evaluation, Assessment and Testing: Research and Practice is a collection of research papers, most of which were presented at the 17th World Congress of the International Association of Applied Linguistics (AILA), which was held in 2014 in Brisbane, Australia. The volume comprises 15 chapters presenting current research projects and discussing issues related to language testing and the development of language assessment instruments in a variety of contexts around the world. This anthology will be of use to both new and seasoned researchers within the field of Applied |

| Sommario/riassunto      | L'ouvrage propose une étude praxéologique des débats parlementaires en contexte autoritaire, qui se fonde sur une analyse détaillée des transcriptions de débats parlementaires ayant eu lieu en Égypte, en Syrie et en Afghanistan. Il montre que la forme parlementaire possède les mêmes propriétés de base dans des régimes de nature pourtant différente, de sorte que les différences s'inscrivent dans un continuum et non dans une opposition. Ce comparatisme s'inscrit donc dans la suite des travaux insistant sur l'existence de dispositifs autoritaires dans les démocraties et de dispositifs démocratiques dans les régimes autoritaires. En effet, si l'étude des débats parlementaires dans une démocratie montre que ceux-ci n'ont qu'une portée décisionnelle limitée – la majorité l'emportant indépendamment des points de vue argumentés –, cette même étude, poursuivie dans les régimes autoritaires, montre que les gouvernants sont contraints de respecter les formes parlementaires et de s'ajuster à celles-ci. |

#### Sommario/riassunto

Every year, the Technical University of Munich, the Universität der Bundeswehr München, and the University of Applied Sciences in Munich invite researchers and practitioners to join the Munich Symposium on Lightweight Design. Experts from industry and academia discuss design tools, applications, and new developments. Topics include, e.g., composite structures, SHM, microstructures, material modelling, design for additive manufacturing, numerical optimization and in particular topology optimization in aerospace, automotive and other industries. The talks are summarized in short articles and presented in this volume.
