

1. Record Nr.	UNINA9910627280503321
Autore	Murphey Yi Lu
Titolo	AI-enabled technologies for autonomous and connected vehicles / / Yi Lu Murphey, Ilya Kolmanovsky, and Paul Watta
Pubbl/distr/stampa	Cham, Switzerland : , : Springer International Publishing, , [2022] ©2022
ISBN	3-031-06780-0
Descrizione fisica	1 online resource (563 pages)
Collana	Lecture Notes in Intelligent Transportation and Infrastructure
Disciplina	025.063637
Soggetti	Artificial intelligence - Environmental applications Vehicular ad hoc networks (Computer networks)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Contents -- Advances, Opportunities and Challenges in AI-enabled Technologies for Autonomous and Connected Vehicles -- 1 Introduction -- 2 Autonomous Vehicles: Current Technologies and Challenges -- 2.1 Levels of Autonomy -- 2.2 AI Technologies in Autonomous Vehicles -- 3 Connectivity and Mobility -- 3.1 Mobility Research -- 3.2 Prediction Model for V2X Communications -- 3.3 Big Data Research in Transportation -- 3.4 Automotive Cybersecurity -- References -- Sensors and Perception -- Semi-autonomous Truck Platooning with a Lean Sensor Package -- 1 Overview -- 2 Literature Survey -- 3 Auburn Platooning System -- 3.1 Dynamic Base Real-Time Kinematic Positioning (DRTK) -- 3.2 Delphi Electronically Scanning Radar (ESR) -- 3.3 Dedicated Short Range Communications -- 3.4 Sensor Fusion -- 4 Testing Campaign -- 5 Results of Sensor Impairment -- 5.1 Effect of a Faulty Radar on Platooning -- 5.2 Effect of a Degraded GPS on Platooning -- 5.3 Effect of Radio Interference -- 5.4 Summary -- 6 Conditional Effects -- 6.1 Occlusions -- 6.2 Rain -- 6.3 Antenna Position -- 6.4 RF Interference -- 6.5 GPS Outage -- 6.6 Road Curvature -- 6.7 Grade -- 7 Conclusion -- References -- Environmental Perception for Intelligent Vehicles -- 1 Sensors -- 1.1 Development of Sensors in Intelligent Autonomous Vehicles -- 1.2 Camera -- 1.3 LiDAR -- 1.4 Radar -- 1.5 Future of Sensors in Intelligent Vehicles -- 2 Data Restoration -- 2.1

RGB Image Restoration -- 2.2 LiDAR Point Cloud Restoration -- 3
 Semantic Segmentation -- 3.1 Semantic Segmentation for RGB Images
 -- 3.2 Semantic Segmentation for RGB-D Images -- 3.3 Semantic
 Segmentation for LiDAR Point Cloud -- 4 Object Detection -- 4.1 2D
 Object Detection -- 4.2 2D Object Detection of Fisheye Camera -- 4.3
 3D Object Detection -- 5 Object Tracking -- 5.1 Object Tracking for
 RGB Images.
 5.2 Object Tracking for Point Cloud -- 6 Simultaneous Localization and
 Mapping -- 6.1 SLAM Overview -- 6.2 2D Visual Location and Mapping
 -- 6.3 3D Visual Location and Mapping -- 7 Multi-sensor Fusion -- 7.1
 Multi-sensor Fusion Overview -- 7.2 LiDAR and Camera Fusion -- 7.3
 LiDAR and Radar Fusion -- 7.4 Radar and Camera Fusion -- References
 -- 3D Object Detection for Autonomous Driving -- 1 Introduction -- 2
 Recent Advance in 3D Object Detection -- 2.1 Cloud Point-Based
 Method -- 2.2 Image-Based Method -- 3 Descriptor Enhanced Stereo
 R-CNN -- 3.1 Overview -- 3.2 Coarse 3D Box Estimation -- 3.3
 Unsupervised Learning of the Local Descriptor -- 3.4 Descriptor-
 Enhanced 3D Box Alignment -- 4 Experiments -- 4.1 Implementation
 Details -- 4.2 Comparison with State-of-the-Art -- 4.3 Multi-class
 Comparison with 3DBBX -- 4.4 Ablation Study -- 4.5 Runtime -- 5
 Conclusion and Future Work -- References -- Comparative Study
 on Transfer Learning for Object Classification and Detection -- 1
 Introduction -- 2 State-of-the-Art Review in DNNs and Transfer
 Learning -- 3 Architecture and Characteristics of CNN Models -- 3.1
 CNN Models for Object Classification -- 3.2 NN Models for Object
 Detection -- 4 Transfer Learning for Object Classification
 and Detection -- 4.1 Transfer Learning for Object Classification -- 4.2
 Transfer Learning for Object Detection -- 5 Conclusion -- References
 -- Future Technology and Research Trends in Automotive Sensing -- 1
 Introduction -- 2 Advancements in Radar and Lidar Sensing -- 3
 Toward Energy Efficient Edge Computing via Optical Advances -- 4
 Conclusion -- References -- Automated Driving Decisions and Control
 -- Robust AI Driving Strategy for Autonomous Vehicles -- 1
 Introduction -- 2 Decision Making: DRL Driving Strategy for Changing
 Lanes -- 2.1 Reinforcement Learning and Deep Reinforcement Learning
 an Introduction.
 2.2 DRL for Autonomous Driving -- 2.3 Vehicle Dynamics -- 2.4
 Simulation Results -- 2.5 Summary -- 3 Executing DRL Decision with
 Motion Control Algorithm -- 3.1 Longitudinal Motion Control -- 3.2
 Lateral Motion Control -- 3.3 Summary -- 4 Generic Safety Filter
 Design with Control Barrier Functions -- 4.1 Control Barrier Functions
 -- 4.2 Calculation of Barrier Constraints -- 4.3 Contextual Selection of
 Decoupled CBF -- 4.4 Examples -- 4.5 Summary -- 5 Integrated
 Driving Policy with DRL, Motion Control, and CBF Safety Filter -- 5.1
 Training Architecture with CBF Safety Filter -- 5.2 Summary -- 6
 Summary and Conclusion -- References -- Artificially Intelligent Active
 Safety Systems -- 1 Introduction -- 1.1 SAE Definitions -- 2 Active
 Safety Technology -- 2.1 Collision Warning -- 2.2 Collision
 Intervention -- 2.3 Driving Control Assistance -- 2.4 Parking
 Assistance -- 2.5 Other Driving Assistance -- 2.6 Beyond Assistance --
 3 Active Safety Potential -- 4 Systems on the Road Today -- 4.1
 Methods -- 4.2 Results -- 4.3 Discussion -- 4.4 Conclusion -- 5
 Promising AI Applications -- 5.1 Deep Learning -- 5.2 Reinforcement
 Learning -- 6 Final Thoughts -- References -- Model Predictive Control
 for Safe Autonomous Driving Applications -- 1 Introduction -- 1.1
 Notation -- 2 Problem Description -- 3 Model Predictive Flexible
 Trajectory Tracking Control -- 4 Tracking an Infeasible Reference -- 5
 Safety-Enforcing MPC -- 6 Simulations -- 6.1 ISS: Stability with

Infeasible Reference -- 6.2 MPFTC: Ensuring Safety of the Controller --
 7 Conclusions -- References -- Energy-Efficient Autonomous Driving
 Using Cognitive Driver Behavioral Models and Reinforcement Learning --
 1 Introduction -- 2 Lane Changes for Energy-Efficient AV Driving --
 3 Powertrain Modeling for Battery Electric Vehicles -- 3.1 Model
 Description -- 3.2 Model Calibration and Validation.
 4 Controller Design -- 4.1 Game-Theoretic Traffic Environment -- 4.2
 Observation and Action Spaces -- 4.3 Reward Function -- 4.4 Training
 Algorithm -- 4.5 Training Process -- 4.6 Autonomous Vehicle Control
 Policy for Benchmarking -- 5 Results -- 5.1 Training for RL-Based
 Policies -- 5.2 Control Performance -- 6 Conclusions -- References --
 Self-learning Decision and Control for Highly Automated Vehicles -- 1
 Introduction -- 2 Scalability -- 3 Performance -- 4 Interpretability -- 5
 Mixed Model -- 6 Emergency Handling -- 7 Conclusion -- References --
 Advanced Driver Assistant Systems -- MAGMA: Mobility Analytics
 Generated from Metrics on ADAS -- 1 Introduction -- 2 Constraints --
 2.1 Data Collection Costs -- 2.2 Data Generation and Collection Issues --
 3 Determination of Actual Feature Experience -- 4 Determination
 of Expected Feature Experience -- 5 ADAS Feature Customer
 Experience Metrics -- 5.1 Binary Feature Availability -- 5.2 Nuanced
 Feature Availability -- 5.3 Clustering for Outlier Discovery -- 6
 Conclusion -- References -- Driver Assistance Systems and Safety-
 Assessment and Challenges -- 1 Introduction -- 2 The Scenario
 Approach -- 2.1 The Idea -- 2.2 Elements of a Scenario Based
 Evaluation -- 3 Scenario Generation and Selection -- 3.1 Scenario
 Generation -- 3.2 Scenarios from Crash Databases -- 3.3 Automated
 Scenario Catalogue Learning -- 4 Scenario Parametrization -- 4.1
 Numerical Assessment Methods -- 5 Representation of the Surrounding
 Traffic -- 5.1 Trajectory Prediction -- 5.2 Threat Assessment -- 6
 Metrics of Risk -- 7 Outlook -- 7.1 Induced Effects on Other Vehicles --
 7.2 Shields and Emergency Systems -- References -- Factors
 Influencing Driver Behavior and Advances in Monitoring Methods -- 1
 Introduction -- 2 Factors Influencing Driver Behavior -- 2.1 Types of
 Human Factors -- 2.2 Types of Environmental Factors -- 2.3 Driver
 Profile.
 3 Driver Behavior Monitoring Methods -- 3.1 Intrusive Measuring
 Methods -- 3.2 Camera Based Measuring Methods -- 3.3 Ergonomic
 and Body Posture Based Measuring Methods -- 3.4 Vehicle Dynamics
 Based Measuring Methods -- 3.5 Hybrid Measuring Methods -- 4 Smart
 Detection Algorithms -- 4.1 Supervised Classification -- 4.2
 Unsupervised Classification -- 5 Deep Learning Neural Network
 Classifiers -- 5.1 Supervised LSTM Classifier -- 5.2 Unsupervised LSTM
 Classifier -- 6 Summary -- References -- Connected Autonomous
 Vehicles, Mobility, and Security -- Towards Learning-Based Control of
 Connected and Automated Vehicles: Challenges and Perspectives -- 1
 Introduction -- 2 Multi-Agent Coordination Problem -- 3 Modeling
 Agent Dynamics -- 3.1 Double Integrator Model -- 3.2 Bicycle Model --
 3.3 Further Extensions -- 3.4 Challenges and Perspectives -- 4
 Optimal Agent Coordination -- 4.1 Local Objectives and Constraints --
 4.2 Collision Avoidance -- 4.3 Centralized Optimal Control Problem --
 4.4 Distributed Solution -- 5 Towards Learning-Based Control -- 5.1
 Model Uncertainties -- 5.2 Mixed-Traffic Scenarios -- 6 Conclusion --
 References -- Virtual Rings on Highways: Traffic Control by Connected
 Automated Vehicles -- 1 Introduction -- 2 Traffic Control by
 Connected Automated Vehicles -- 2.1 Simplified Models for
 Longitudinal Vehicle and Traffic Dynamics -- 2.2 Vehicle Control
 Influencing Traffic -- 2.3 Traffic Control -- 3 Benefits of Connectivity --
 3.1 Simulation Results -- 3.2 Energy Efficiency -- 4 Dynamics of

Traffic Flow -- 4.1 Linearized Dynamics -- 4.2 Transfer Functions -- 5
Stability of Traffic Flow -- 5.1 Stability Conditions -- 5.2 Relationship
of the Stability Conditions -- 6 Conclusions -- References --
Socioeconomic Impact of Emerging Mobility Markets and
Implementation Strategies -- 1 Introduction -- 2 Theoretical
Preliminaries.
2.1 An Introduction to Mechanism Design.
