Sommario/riassunto

The articles in this volume are dedicated to Professor Ahmad Mahdavi Damghani for the breadth and depth of his interests and his influence on those interests. They attest to the fact that his fervor and rigorously surgical attention to detail have found fertile ground in a wide variety of disciplines, including (among others) Persian literature and philology; Islamic history and historiography; Arabic literature and philology; and Islamic philosophy and jurisprudence. The volume has brought together some of the most respected scholars in the fields of Islamic studies and Islamic literatures, all his prior students, to contribute with articles that touch on the fields Professor Mahdavi Damghani has so permanently touched with his astonishing scholarship and attention to detail.

Sommario/riassunto

This book focuses on how firms should engage ethical choices in developing and deploying digital technologies. Digital technologies are devices that rely on rapidly accelerating digital sensing, storage, and transmission capabilities to intervene in human processes. While the ethics of technology is analyzed across disciplines from science and technology studies (STS), engineering, computer science, critical management studies, and law, less attention is paid to the role that firms and managers play in the design, development, and dissemination of technology across communities and within their firm. This book covers the topic from three angles. First, it illuminates diverse facets of the intersection of technology and business ethics. Second, it uses themes to explore what business ethics offers to the study of technology and, third, what technology studies offer to the field of business ethics. Each field brings expertise that, together, improves our understanding of the ethical implications of technology. Chapter "A Micro-ethnographic Study of Big Data-Based Innovation in the Financial Services Sector: Governance, Ethics and Organisational Practices", chapter "The Challenges of Algorithm-Based HR Decision-Making for Personal Integrity" and chapter "Female CEOs and Core Earnings Quality: New Evidence on the Ethics Versus Risk-Aversion Puzzle" are available open access under a Creative Commons Attribution 4.0 International license via link.springer.com.
