Success and failure of the 'new order', 1967-1998 9. Crisis, recovery and the evolution of living standards since independenceNotes; References; Index
Sommario/riassunto	"Based on new datasets, this book presents an economic history of Indonesia. It analyses the causes of stagnation of growth during the colonial and independence period, making use of new theoretical insights from institutional economics and new growth theory. The book looks at the major themes of Indonesian history: colonial exploitation and the successes and limitations of the post 1900 welfare policies, the price of instability after 1945, and the economic miracle after 1967. The book not only discusses economic change and development - or the lack thereof - but also the institutional and socio-political structures that were behind these changes. It also presents a lot of new data on the changing welfare of the Indonesian population, on income distribution, and on the functioning of markets for rice, credit and labour. Concluding with a discussion on whether the poor profited from

the economic changes, this book is a useful contribution to Southeast Asian Studies and International Economics."--Publisher's description.

Sommario/riassunto	This book tells the story of Germany between the years 1914–1945 through the history of its sounds and noises. From the killing grounds of the Great War, passing through the roaring optimism of the 1920s, and up to the horrifying spectacle of the Nazis and the dreadful apocalypse of the Second World War, sound became the epitaph of an era that was mostly dominated by war and a global sense of crisis.

Yaron Jean reconstructs and analyses these moments when sound and its meaning became history, and places them in a single study that provides a unique perspective on the history of modern Germany in one of its most turbulent centuries. Yaron Jean teaches history at Oranim Academic College of Education and Sapir Academic College, Israel. His research focuses on the relations between technology and human experience in twentieth-century Europe. He also researches the socio-technological legacy of Germany in non-European history.
