

1. Record Nr.	UNINA9910631096203321
Titolo	Advances in mobile computing and multimedia intelligence : 20th International Conference, MoMM 2022, virtual event, November 28-30, 2022, proceedings // Pari Delir Haghighi, Ismail Khalil, Gabriele Kotsis, editors
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2022] ©2022
ISBN	3-031-20436-0
Descrizione fisica	1 online resource (181 pages)
Collana	Lecture notes in computer science ; ; 13634
Disciplina	006.3
Soggetti	Artificial intelligence Mobile computing Multimedia systems
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Preface -- Organization -- Embedded Machine Learning for Data Quality Enhancement in Smart Systems (Abstracts of Keynote Talk) -- Contents -- Applications of Classification -- Classification and Impact of Call-to-Actions in Push-Notifications -- 1 Introduction -- 2 Background -- 3 Methodology -- 4 Call-to-Action Classification -- 4.1 Annotated CTA Data -- 4.2 Data Augmentation -- 4.3 Implementation -- 4.4 Evaluation -- 5 Impact of Call-to-Actions In-the-Wild -- 5.1 Web Push-Notification Evaluation -- 5.2 Mobile Push-Notification Evaluation -- 6 Conclusions -- References -- An Intelligent ML-Based IDS Framework for DDoS Detection in the SDN Environment -- 1 Introduction -- 2 Related Works -- 3 Proposed Method -- 3.1 Data Acquisition -- 3.2 Selection of ML Method -- 4 Case Study -- 4.1 Dataset Selection -- 4.2 Choice of ML Model -- 5 Conclusion -- References -- Effects on Separated Learning of Acquiring Physical Movement Skills Classified by Level of Difficulty -- 1 Introduction -- 2 Implementation -- 3 Experiment -- 3.1 Learning Method -- 3.2 Learning Cost -- 3.3 Experimental Conditions -- 4 Results -- 4.1 Effects of Separated Learning for Learning the Dance Steps -- 5

Summary -- References -- Now, Later, Never: A Study of Urgency in Mobile Push-Notifications -- 1 Introduction -- 2 Background -- 3 Methodology -- 3.1 Mobile Push-Notification Dataset -- 3.2 Annotating Urgency with APN -- 3.3 Crowdsourced Annotation -- 4 Understanding Urgency in Mobile Push-Notifications -- 5 Evaluating Urgency Classification -- 5.1 Experiment 1 - Baseline -- 5.2 Experiment 2 - Data Augmentation -- 5.3 Experiment 3 - Time Expressions -- 5.4 Experiment 4 - Delivery Date -- 6 Conclusions -- References -- Image and Video Processing -- Efficient Subjective Video Quality Assessment Based on Active Learning and Clustering -- 1 Introduction.

2 Efficient Subjective VQA Based on Active Learning -- 2.1 Overview of AL-SVQA -- 2.2 Clustering Based Sampling Strategy -- 2.3 Dual Regression Models for Video Quality Prediction -- 2.4 Stop Criterion -- 2.5 Automatic Labelling -- 3 Experiments -- 3.1 Dataset -- 3.2 Experimental Settings -- 4 Experimental Results -- 4.1 Performance of AL-SVQA -- 4.2 Effect of Different Sampling Strategies -- 5 Conclusion -- References -- Curvable Image Markers: Toward Trackable Markers for Every Surface -- 1 Introduction -- 2 Related Work -- 3 Methodology -- 3.1 Detecting Curved Candidates -- 3.2 Curve Extraction and Modeling -- 3.3 Identifying Curved Markers -- 3.4 Image Marker -- 4 Evaluation -- 4.1 Detection Accuracy -- 4.2 Visual Appeal of Image Marker -- 5 Conclusion -- References -- Design Exploration for Better Security of Recognition-Based Image Authentication in Mobile Environment -- 1 Introduction -- 2 Related Work -- 3 Our Approach and Prototype System -- 4 Usability Evaluation -- 5 Discussion and Conclusion -- References -- A Scheduling Method for Division-Based Broadcasting on Dynamic Video Delivery -- 1 Introduction -- 2 Dynamic Update of Delivery Schedules -- 3 Proposed Method -- 3.1 Scheduling Procedure -- 3.2 Implementation -- 4 Evaluation -- 4.1 Evaluation Environment -- 4.2 Number of Segments and Amount of Waiting Time -- 4.3 Available Bandwidth and Waiting Time -- 5 Conclusion -- References -- Mobile Computing and Wireless Sensors -- Simulating Scenarios to Evaluate Data Filtering Techniques for Mobile Users -- 1 Introduction -- 2 Data Filtering-Based Mobile Information Services -- 2.1 Social-Distance and Context-Aware Mobile Recommender Systems -- 2.2 Social-Distance-Preserving Information Services for Drivers -- 3 Simulation of Scenarios to Evaluate Mobile Recommenders.

4 Simulation of Scenarios to Evaluate Strategies to Suggest Parking Spaces to Drivers -- 5 Experimental Evaluation -- 5.1 Experiments with RecMobiSim -- 5.2 Experiments with the Parking Simulator -- 6 Conclusions and Future Work -- References -- BetterPlanet: Sustainability Feedback from Digital Receipts -- 1 Introduction -- 2 The BetterPlanet System and Study -- 2.1 Application Architecture and Design -- 2.2 CO<sub>2</sub>-Data and CO<sub>2</sub>-Scoring Model for BetterPlanet -- 2.3 Study Participants -- 3 Results and Discussion -- 4 Limitations and Outlook -- 5 Conclusion -- References -- Context-Aware Human Activity Recognition (CA-HAR) Using Smartphone Built-In Sensors -- 1 Introduction -- 2 Related Work -- 3 Proposed Context-Activity Model -- 4 Context-Aware Human Activity Recognition (CA-HAR) -- 4.1 Basic Physical Activity Recognition -- 4.2 Context Management -- 4.3 Context-Aware HAR Integration -- 5 Implementation -- 6 Selection of Deep Learning (DL) Model -- 7 Scenario-Based Demonstration -- 7.1 Illustrative Simulation Scenario 1 - Studying/Working/Web Surfing (Home Activity) -- 7.2 Illustrative Simulation Scenario 2 - Commuting by Private Vehicle -- 7.3 Analysis of Results and Discussions -- 8 Conclusion and Future Work -- References -- An Improved 3DIHDV-

HOP Localization Algorithm Using for Smart Irrigation Applications -- 1  
Introduction -- 2 The DV-HOP Localization Algorithm -- 3 Related  
Works -- 4 A Proposition of 3DIHDV-HOP Algorithm -- 5 Simulation  
Result -- 6 Conclusion -- References -- Online Teaching  
and Movements -- Online Dance Lesson Support System Using Flipped  
Classroom -- 1 Introduction -- 2 Related Works -- 3 Preliminary  
Investigation -- 3.1 Lesson Design -- 3.2 Participants' Impressions --  
4 Proposed Method -- 4.1 On-Demand Lesson: Basic Movement  
Learning Support Tool -- 4.2 Real-Time Lesson -- 5 Summary and  
Future Work -- References.

Who Shapes the Network of a Pedagogical Space? Clues  
from the Movements in the Physical Places -- 1 Introduction -- 2  
Related Work -- 2.1 Pedagogical Space -- 2.2 Multimodality  
in Pedagogical Spaces -- 3 Methods -- 3.1 Measurements -- 3.2  
Subject and Research Site -- 3.3 Equipment -- 3.4 Procedure -- 4  
Results -- 4.1 Offline Lecture -- 4.2 Online Lecture -- 4.3 Hybrid  
Lecture -- 5 Discussion -- 6 Conclusion -- References -- Resolving  
Learners Misunderstandings Using an Adaptive Divide and Correct  
Technique -- 1 Introduction -- 2 Related Works -- 2.1 Formative  
Feedback -- 2.2 Feedback Models -- 2.3 Learning Analytic -- 3  
Solution Overview -- 3.1 Clustering Similar Misunderstanding -- 3.2  
Providing and Verifying Feedback -- 3.3 Estimating Feedback  
Effectiveness -- 4 Experiments and Results -- 4.1 Experiments Settings  
-- 4.2 Experiment Scenarios -- 4.3 Results: Performance Analysis --  
4.4 Results: Participants Analysis -- 5 Conclusion and Future Work --  
References -- A Stumble Detection Method for Programming with  
Multi-modal Information -- 1 Introduction -- 2 Related Work -- 3  
Proposed Method -- 3.1 Assumed Environment -- 3.2 Stumble  
Detection Method -- 3.3 Web Editor Implementation for Retrieving  
Code-Related Metrics -- 4 Evaluation -- 4.1 Procedure -- 4.2 Result --  
5 Conclusion -- References -- Author Index.
