

1. Record Nr.	UNINA9910632486103321
Titolo	Recent developments in mechanics and design : select proceedings of INCOME 2021 // edited by Shriram Hegde, Abhishek Mishra, D.K. Singh
Pubbl/distr/stampa	Singapore : , : Springer, , [2023] ©2023
ISBN	981-19-4140-8
Descrizione fisica	1 online resource (288 pages)
Collana	Lecture Notes in Mechanical Engineering
Disciplina	780
Soggetti	Mechanical engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Intro -- Preface -- Contents -- About the Editors -- Analysis of Single Overload Effect on Fatigue Crack Propagation Using Modified Virtual Crack Annealing Model -- 1 Introduction -- 2 Modified Virtual Crack Annealing (MVCA) Model -- 3 Material and Methodology -- 4 Result and Discussion -- 5 Conclusion -- References -- Design of Experiments Technique for Evaluation of Material Removal and Surface Quality of Ductile Material -- 1 Introduction -- 2 Experimental Work -- 2.1 Workpiece Preparation -- 2.2 Aluminum Tubes Processing by MFA-AFM Machine -- 3 Design of Experiments -- 4 Results and Discussion -- 4.1 Generation of the Models -- 4.2 Analysis of the Models -- 4.3 Evaluation of Material Removal Rate (MRR) -- 4.4 Evaluation of Percentage Change in Surface Roughness (% Ra) -- 4.5 Response and Input Parametric Optimization -- 4.6 Surface Analysis -- 5 Conclusions -- References -- 4D Printing-A Smart Way of 3D Printing: A Brief Review -- 1 Introduction -- 2 4D Printing -- 2.1 Process -- 2.2 Smart Materials -- 2.3 Smart Design -- 2.4 3D Printer -- 3 Conclusions -- References -- Stabilization and Trajectory Control of High-Altitude Balloons for Rockoons-A Review -- 1 Introduction -- 2 Ballooning -- 2.1 Single Ballooning Structure -- 2.2 Multi-Ballooning System -- 3 Stabilization and Trajectory Control -- 3.1 Stratosail Balloon Guidance System -- 3.2 Dual Balloon System -- 3.3 Electrohydrodynamic Propulsion -- 3.4 Cold Gas Propulsion System --

4 Results and Discussion -- 5 Conclusion -- References -- A Review on "Designs and Fabrication" for the Next Generation of Organic Solar Cells Technology -- 1 Introduction -- 2 The Fundamental Principles of Organic Solar Cells -- 3 A Perspective on Organic Solar Cell Design -- 4 Integration of Device Engineering and New Architectures for Improving OSC Performance -- 4.1 Single-Layer Organic Solar Cells. 4.2 Organic-Polymer Bilayer Heterojunction Solar Cells -- 4.3 Bulk Heterojunction Organic Solar Cell -- 4.4 Organic Tandem Solar Cell's Structure -- 5 Innovative Thoughts and Recent Advancements in Organic Solar Cell Architectures -- 6 Stability -- 6.1 Chemical Degradation -- 6.2 Physical Degradation -- 7 Conclusion -- References -- Parametric Study of Stiffened Composite Structures Using Design of Experiments -- 1 Introduction -- 2 Problem Statement -- 3 Design Factors and Their Levels -- 4 Taguchi's Standard Design Array -- 5 Finite Element Modeling -- 6 Results and Discussions -- 6.1 Analysis of Variance [ANOVA] -- 6.2 Design Optimization -- 7 Conclusions -- References -- Simulation of a Vision-Based Model of a Robotic Work Cell (6-Axis) -- 1 Introduction -- 2 Background -- 3 Experimental Details -- 3.1 Selection of Robot -- 3.2 Parametric Setup for Analysis -- 4 Results and Discussions -- 4.1 Inverse Kinematics -- 5 Conclusions -- References -- Numerical Simulations of an Interaction of a Blast Wave Produced from a Shock Tube with an Object Placed at Various Positions -- 1 Introduction -- 2 Numerical Methodology -- 3 Results and Discussion -- 4 Conclusions -- References -- The Influence of Notch-Width Ratio on Mechanical and Electromagnetic Radiation Parameters During Tensile Deformation in FCC Metals -- 1 Introduction -- 2 Experimental -- 2.1 Materials and Methods -- 2.2 Instrumentation -- 2.3 Parameters for Evolution -- 2.4 Measurement of EMR Parameters -- 3 Results and Discussions -- 3.1 Correlation Between Notch-Width Ratio and Mechanical and EMR Parameters -- 3.2 Correlations Between EMR Parameters and the Plastic Zone Radius in Aluminium and Copper -- 3.3 Correlation Between Average EMR Energy Release Rate and Elastic Strain Energy Release Rate. 3.4 Correlation of Average Electromagnetic Release Rate with $(b \cdot \text{Suc}) / U_f$ in Aluminium and Copper -- 4 Conclusions -- References -- Comparison of In-Vitro Corrosion Behavior for Polished and WEDM Machined ZM21 Magnesium Alloy Used as Biodegradable Orthopedic Implants -- 1 Introduction -- 2 Materials and Methods -- 2.1 Alloy Preparation and Sample Processing -- 2.2 Simulated Body Fluid (SBF) Preparation -- 2.3 Microstructure and Surface Analysis -- 2.4 Mechanical Characterization -- 2.5 Characterization of Corrosion Behavior -- 2.6 Evaluation of Biocompatibility -- 3 Results and Discussions -- 3.1 Microstructural Analysis for Polished and WEDM Machined ZM21 Magnesium Alloy -- 3.2 Mechanical Properties -- 3.3 Degradation Study of ZM21 (Polished and WEDM Machined) Sample -- 3.4 pH Variation Study of SBF Solution in Contact with ZM21 Samples -- 3.5 Surface Morphology of Corroded ZM21 Mg Alloy -- 4 Conclusion and Future Scope -- References -- Investigation of Angular Distortion Using Mathematical Modelling in TIG Welded Dissimilar Stainless Steel 304 and 316 Grades -- 1 Introduction -- 2 Experimental Setup -- 3 Methodology of Investigation -- 3.1 Identification of Input Parameters and Their Operating Range -- 3.2 Measuring of Angular Distortion -- 3.3 Development of Mathematical Model -- 4 Result and Discussion -- 4.1 Main Effect of Input Parameters on the Angular Distortion -- 4.2 Interaction Plots of Distortion, Speed and Torch Angle -- 4.3 Interaction Plot of Distortion, Current and Torch Angle -- 4.4 Interaction Plot of Distortion, Speed and Current -- 5 Conclusion -- References -- Development of Probe for Arsenic and Fluoride Detection

in Drinking Water -- 1 Introduction -- 2 Methodology -- 2.1 Synthesis of Material -- 2.2 Purification of Material -- 2.3 Photoluminescence (PL) Principles and Sensing Mechanism -- 2.4 Sensor Modules. 2.5 Artificial Intelligence in Sensor Development -- 3 Results and Discussions -- 3.1 The Chemical Configuration and Planned Sense Method of Sensor for as Detection -- 3.2 The Chemical Configuration and Planned Sense Method of Sensor for Fluoride (F) detection -- 4 Material-Receptor Binding Techniques -- 4.1 Coordination and Chelation -- 4.2 Electro-Static Effect -- 4.3 Oxidation-Reduction Reaction -- 4.4 Affinity of DNA Aptamer -- 5 Conclusion -- 6 Future Scope -- References -- Study of Smart Sensor Designing Parameters for Water Resources Management -- 1 Introduction -- 2 Methodology -- 2.1 Sensing Node -- 2.2 Microcontroller -- 2.3 Wireless Networking Node -- 2.4 Alarming Node -- 3 Geo-Specificity -- 4 Result -- 5 Conclusion -- 6 Future Scope -- References -- Redesign of Assembly Line for Productivity Enhance in an Automotive Industry Using Line Balancing Technique -- 1 Introduction -- 2 Methodology -- 2.1 Takt Time Calculation -- 2.2 Establishing Time Studies -- 2.3 Identify Bottle Necks and Excess Capacity -- 2.4 Reallocate Resources -- 2.5 Make Other Improvements -- 3 Lay Out of CrankShaft Cell 3 Assembly Line -- 4 Graph of Manual Time vs Takt Time -- 4.1 Takt Time Calculation -- 4.2 Bottle Neck Time Identification -- 5 Conclusion -- References -- Experimental Characterization and FEA Comparison Between Wave and Helical Springs -- 1 Introduction -- 1.1 Vibration Isolation System -- 2 Theoretical Calculations -- 3 Cad Modelling of Springs -- 4 FEA Calculations -- 5 Experimental Calculations -- 6 Results and Discussions -- 7 Modal Analysis -- 8 Conclusions -- 9 Future Scope -- References -- Mechanical Properties Enrichment of Glass Fiber Epoxy by Sugarcane Bagasse -- 1 Introduction -- 2 Experimental Method -- 2.1 SBG Preparation -- 2.2 Matrix Mixture -- 2.3 Composite Plate Fabrication -- 3 Result and Discussion -- 3.1 Tensile Test. 3.2 AE Results -- 3.3 Charpy Test -- 4 Conclusion -- References -- A Neural Network Based Approach to Determine Chatter Stability in Milling for a Variable Pitch Cutter -- 1 Introduction -- 2 Background -- 3 ANN Model -- 4 Results -- 5 Conclusion -- 6 Future Scope -- References -- Effect of Chromium on Mechanical and Corrosion Behaviour of Ferrous Metal Matrix Composites by Using Powder Metallurgy Route -- 1 Introduction -- 2 Powder Production -- 2.1 Selection of Powders -- 2.2 Mixing of Powders -- 2.3 Compaction -- 2.4 Sintering -- 3 Mechanical Testing -- 3.1 Hardness Test -- 3.2 Corrosion Resistance -- 3.3 Microstructural Study -- 4 Results and Discussion -- 4.1 Vickers Hardness Values -- 4.2 Microstructure -- 4.3 Salt Spray Test -- 4.4 Tafel Plots -- 5 Conclusion -- References -- Study of Effect of Protrusions on Cones in Hypersonic Flow -- 1 Introduction -- 2 Computational Methodology -- 3 Results and Discussions -- 4 Conclusions -- References -- Design and Analysis of Multifacility Splint for Children with Congenital Clubfoot Deformities -- 1 Introduction -- 1.1 Treatments for CTEV Deformation -- 1.2 Problems with Existing Clubfoot Splints -- 2 Methodology and Techniques -- 2.1 Design of Dynamic Splint Components and Specifications -- 2.2 Conceptual CAD Model Design of Dynamic Splint -- 3 CAD Model of Dynamic Splint -- 4 Materials Selected for Splint Components -- 5 Experimentation Procedure-Observations and FEA Analysis of the Splint -- 5.1 Results of Foot Plate Deformation -- 5.2 Static Structural Analysis of Splint -- 5.3 Manufacturing of Splint -- 6 Conclusion and Future Scope -- References -- Experimental Validation of End Effector Position and Orientation for a 5 DoF Robotic Manipulator -- 1 Introduction -- 2

Fabrication and Methodology -- 2.1 Fabrication -- 2.2 Methodology --
3 Results and Discussion -- 3.1 Variation in Position.
3.2 Variation in Orientation.
