

1. Record Nr.	UNINA9910632487503321
Titolo	Magnetic resonance imaging in deep brain stimulation // Alexandre Boutet, A. M. Lozano, editors
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2022] ©2022
ISBN	3-031-16348-6
Descrizione fisica	1 online resource (127 pages)
Disciplina	616.8047548
Soggetti	Brain - Magnetic resonance imaging Brain stimulation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Preface -- Contents -- 1: Deep Brain Stimulation and Magnetic Resonance Imaging: Introduction -- References -- 2: A Historical Perspective on the Role of Imaging in Deep Brain Stimulation -- Introduction -- Ventriculography -- Modern Neuroimaging Techniques: Magnetic Resonance Imaging and Computed Tomography -- Recent Advances in DBS Neuroimaging -- References -- 3: Overview of the Clinical Aspects of DBS -- Overview and History of DBS -- Brief History of Neurostimulation in Functional Neurosurgery -- DBS for Psychosurgery -- DBS for Pain -- DBS for Epilepsy -- DBS for Movement Disorders -- Other Indications -- Regulation of DBS Implants -- Patient Selection and Referral -- Neurology Screening -- Neurosurgical Evaluation -- Neuropsychiatric Testing -- Neuroimaging -- Contraindications to Surgery -- Clinical Considerations and Target Selection -- DBS for Essential Tremor -- DBS for Idiopathic Parkinson's Disease -- STN DBS -- GPi DBS -- ViM/cZi for Tremor-Dominant PD -- DBS for Dystonia -- DBS for Epilepsy -- DBS for Other Indications -- Surgical Considerations -- Intraoperative Considerations -- Postoperative Considerations -- Future Directions and Innovations -- References -- 4: Preoperative Planning of DBS Surgery with MRI -- Introduction -- Methods -- Search -- Sequence Evaluation -- Most Common DBS Targets -- Subthalamic Nucleus -- Visualizing the STN -- Globus Pallidus -- Visualizing the GP -- Thalamus -- Direct MRI

Visualization -- Limitations -- Future Directions -- Conclusions --
References -- 5: Safety of Magnetic Resonance Imaging in Patients
with Deep Brain Stimulation -- Introduction -- Standards of Safety
Testing -- Magnetic Field Components within the Suite --
Heterogeneity in Implanted Configurations and Positioning -- MR-
Induced Heating Concerns -- The Unpredictable Nature of Heating --
Measuring Heating.
Other Potential MRI-Related Risks -- Unintended Stimulation --
Magnetically Induced Displacement or Vibrations -- Internal Pulse
Generator Malfunctioning -- Magnetic Resonance Imaging Safety
Studies with Humans -- Special Considerations -- The Impetus
for Using High-Field MRI -- High-Performance Sequences -- Future
Directions -- Magnetic Resonance Safety Innovations -- Possibilities
for a New MR Safety Process -- Conclusion -- References -- 6:
Postoperative MRI Applications in Patients with DBS -- Introduction --
Electrode Localisation and Mapping of Optimal DBS Target Using Pre-
and Postoperative Imaging -- MNI Space and Investigating Potential
Mechanisms of DBS -- Connectomics to Investigate Brain Networks
of DBS -- Summary and Conclusion -- References -- 7: Acquiring
Functional Magnetic Resonance Imaging in Patients Treated with Deep
Brain Stimulation -- Introduction -- Challenges Associated
with Acquiring fMRI in DBS Patients -- fMRI Study Results -- fMRI
Acquisition, Experimental Design Paradigms and Analysis -- Movement
Disorders -- Parkinson's Disease (PD) -- Essential Tremor (ET) --
Neuropsychiatric Disorders -- Obsessive-Compulsive Disorder (OCD)
-- Depression, Anorexia, and Bipolar -- Pain -- Epilepsy -- Other DBS
Indications -- Potential Applications and Future Directions --
References -- 8: MRI in Pediatric Patients Undergoing DBS --
Introduction -- Indications for Pediatric DBS -- Imaging Considerations
for Children -- MR Imaging Acquisition for Planning DBS --
Neuroimaging and the Developing Brain -- Clinical Decision-Making
for Children Based on Neuroimaging -- DBS Targeting in Children --
Postoperative DBS Imaging -- Ethics of Pediatric DBS and Neuroimaging
-- Conclusions -- References -- 9: Deep Brain Stimulation
and Magnetic Resonance Imaging: Future Directions -- References --
Index.
