

1. Record Nr.	UNINA9910632998803321
Autore	Payá-Vayá Guillermo
Titolo	Towards a common software/hardware methodology for future advanced driver assistance systems : the DESERVE approach / / editors, Guillermo Paya-Vaya, Holger Blume
Pubbl/distr/stampa	Taylor & Francis, 2017 Gistrup, Denmark ; ; Delft, The Netherlands : , : River Publishers, , 2017 ©2017
ISBN	1-00-333984-0 1-003-33984-0 1-000-79367-2 87-93519-13-3
Edizione	[1st ed.]
Descrizione fisica	1 online resource (312 pages) : illustrations, tables
Collana	River Publishers Series in Transport Technology
Disciplina	629.222
Soggetti	Automobiles - Technological innovations
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Sommario/riassunto	The European research project DESERVE (DEvelopment platform for Safe and Efficient dRIVE, 2012-2015) had the aim of designing and developing a platform tool to cope with the continuously increasing complexity and the simultaneous need to reduce cost for future embedded Advanced Driver Assistance Systems (ADAS). For this purpose, the DESERVE platform profits from cross-domain software reuse, standardization of automotive software component interfaces, and easy but safety-compliant integration of heterogeneous modules. This enables the development of a new generation of ADAS applications, which challengingly combine different functions, sensors, actuators, hardware platforms, and Human Machine Interfaces (HMI). This book presents the different results of the DESERVE project concerning the ADAS development platform, test case functions, and validation and evaluation of different approaches. The reader is invited to substantiate the content of this book with the deliverables published

during the DESERVE project. Technical topics discussed in this book include: Modern ADAS development platforms; Design space exploration; Driving modelling; Video-based and Radar-based ADAS functions; HMI for ADAS; Vehicle-hardware-in-the-loop validation systems
