

1. Record Nr.	UNISA996465575303316
Titolo	Requirements Engineering: Foundation for Software Quality [[electronic resource]] : 16th International Working Conference, REFSQ 2010, Essen, Germany, June 30-July 2, 2010. Proceedings // edited by Roel Wieringa, Anne Persson
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2010
ISBN	1-280-38776-9 9786613565686 3-642-14192-7
Edizione	[1st ed. 2010.]
Descrizione fisica	1 online resource (XII, 280 p. 62 illus.)
Collana	Programming and Software Engineering ; ; 6182
Disciplina	005.1
Soggetti	Software engineering Computer communication systems Application software Management information systems Computer science Computers and civilization Software Engineering/Programming and Operating Systems Software Engineering Computer Communication Networks Information Systems Applications (incl. Internet) Management of Computing and Information Systems Computers and Society Essen <2010>
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Keynote -- Keynote Talk Piecing Together the Requirements Jigsaw-Puzzle -- Decision-Making in Requirements Engineering -- Understanding the Scope of Uncertainty in Dynamically Adaptive Systems -- Use of Personal Values in Requirements Engineering -- A Research Preview -- Requirements and Systems Architecture Interaction

in a Prototypical Project: Emerging Results -- Scenarios and Elicitation
-- Videos vs. Use Cases: Can Videos Capture More Requirements under
Time Pressure? -- Supporting the Consistent Specification of Scenarios
across Multiple Abstraction Levels -- Product Families I --
Requirements Value Chains: Stakeholder Management and
Requirements Engineering in Software Ecosystems -- Binary Priority List
for Prioritizing Software Requirements -- Requirements Patterns --
Towards a Framework for Specifying Software Robustness
Requirements Based on Patterns -- A Metamodel for Software
Requirement Patterns -- Validation of the Effectiveness of an
Optimized EPMcreate as an Aid for Creative Requirements Elicitation --
Product Families II -- Towards Multi-view Feature-Based Configuration
-- Evaluation of a Method for Proactively Managing the Evolving Scope
of a Software Product Line -- Requirements Engineering in Practice --
Challenges in Aligning Requirements Engineering and Verification in a
Large-Scale Industrial Context -- On the Perception of Software Quality
Requirements during the Project Lifecycle -- Lessons Learned from
Integrating Specification Templates, Collaborative Workshops, and Peer
Reviews -- A Case Study on Tool-Supported Multi-level Requirements
Management in Complex Product Families -- Natural Language -- A
Domain Ontology Building Process for Guiding Requirements Elicitation
-- Tackling Semi-automatic Trace Recovery for Large Specifications --
Ambiguity Detection: Towards a Tool Explaining Ambiguity Sources --
Ambiguity in Natural Language Software Requirements: A Case Study --
Security Requirements -- On the Role of Ambiguity in RE -- Towards a
Framework to Elicit and Manage Security and Privacy Requirements
from Laws and Regulations -- Visualizing Cyber Attacks with Misuse
Case Maps -- Poster -- How Do Software Architects Consider Non-
Functional Requirements: A Survey.

Sommario/riassunto

This volume compiles the papers accepted for presentation at the 16th Working Conference on Requirements Engineering: Foundation for Software Quality (REFSQ 2010), held in Essen during June 30 and July 1-2, 2010. Since 1994, when the first REFSQ took place, requirements engineering (RE) has never ceased to be a dominant factor influencing the quality of software, systems and services. Initially started as a workshop, the REFSQ working conference series has now established itself as one of the leading international forums to discuss RE in its (many) relations to quality. It seeks reports of novel ideas and techniques that enhance the quality of RE products and processes, as well as reflections on current research and industrial RE practices. One of the most appreciated characteristics of REFSQ is that of being a highly interactive and structured event. REFSQ 2010 was no exception to this tradition. In all, we received a healthy 57 submissions. After all submissions had been carefully assessed by three independent reviewers and went through electronic discussions, the Program Committee met and finally selected 15 top-quality full papers (13 research papers and 2 experience reports) and 7 short papers, resulting in an acceptance rate of 38 %. The work presented at REFSQ 2009 continues to have a strong anchoring in practice with empirical investigations spanning over a wide range of application domains.

2. Record Nr.	UNINA9910633896203321
Autore	Saviano, Marialuisa
Titolo	Le aree protette come modelli di sviluppo sostenibile nella transizione ecologica / Marialuisa Saviano
Pubbl/distr/stampa	Torino, : Giappichelli, 2021
ISBN	978-88-921-4286-2 978-88-921-8544-9
Descrizione fisica	XIX, 121 p. : ill. ; 24 cm
Collana	Systems management. Sezione italiana ; 9
Disciplina	338.927
Locazione	DDCP FGBC
Collocazione	22 T 249 VI L 124
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
